

PROTOCOL USAGE

PHASE 2

Key Functions

- Supports the body's natural mechanisms for removing unwanted factors
- Promotes digestive tract health, including normal bile flow, microbiome composition, and bowel movements
- Nurtures the body's immune and antioxidant systems, aiding inflammatory balance

Details

Developed over years of clinical trials, Para 2 Immune & Digestive Support is a multi-herb formula specifically designed for powerful immune and digestive support. The proprietary blend includes multiple ingredients built to maximize the body's ability to boost immune system function and detox.

How it Works

- This herbal supplement is a combination of vidanga, neem, triphala, clove, holarrhena, and BioActive Carbon (fulvic acid extracts). The BioActive Carbon supports the herbs' delivery through the digestive tract to where they're needed.
- The herbal ingredients have different modes of action to support the removal of unwanted factors. These actions may include disrupting protective mechanisms that enable invaders to linger.
- On top of that, the herbs in Para 2 may support normal microbiome health, bile flow, and elimination. That could aid the removal of unwanted factors.

Ingredients

BioActive Carbon (Extracts of Humic and Fulvic Acid)

Clove

Triphala

Holarrhena (Kutaja)

Vidanga

Neem
