

# Tick Recovery Guide:

## What to Do Immediately Following a Tick Bite

### 1. Remove the tick the right way:

### 2. Save the tick for testing:

### 3. Use topical support:

### 4. Boost the immune system:

	WAKE-UP	MORNING	NOON	EVENING	BEDTIME
IS-BORR		1		1	
IS-BOOST		1		1	

### 5. Increase energy and decrease toxicity:

	WAKE-UP	MORNING	NOON	EVENING	BEDTIME
BioToxin Binder		2		2	
BioActive Carbon Minerals		10		10	
MitoATP		10		10	

# Tick Recovery Guide:

## What to Do Immediately Following a Tick Bite

### 1. Remove the tick the right way:

The best way to detach an embedded tick is by using a tick removal device to spin and remove the tick. Avoid using tweezers or your bare fingers. Avoid pouring anything over the tick, such as alcohol or essential oils, which can cause the tick to infect you. Avoid flame, as well. Having a tick removal device on hand before the tick bite is always a good measure. Tools can be found on Amazon by searching tick removal tool.

### 2. Save the tick for testing:

After the tick has been removed, save it in a bag if you wish to send it in for testing. Visit [https://tickencounter.org/tick\\_testing](https://tickencounter.org/tick_testing) for more information, or your choice of testing.

### 3. Use topical support:

Next, once the tick is removed, cover the tick sting in an anti-pathogen combination, with a few drops of IS-BORR or IS-BOOST. Both contain anti-pathogenic herbs to enhance immune function. Next, use a few drops of BioMolecular Oxygen on top of the herbs. If you want to make a salve, you can add the herbs to coconut oil or another salve base. Apply every hour to the bite for the first few days.

### 4. Boost the immune system:

Take IS-BORR and IS-BOOST internally as directed for anti-pathogenic and detox support. They can be used internally for several months following the tick bite.

### 5. Increase energy and decrease toxicity:

**Optimizing mitochondria is one of the best ways to stay healthy and maintain immune function.**

Take MitoATP to support mitochondrial function.

Take BioActive Carbon Minerals to help deliver nutrients for proper cellular function.

Take BioToxin Binder to mop up biological toxins that may inhibit the immune system.
