

Gluco Optimizer

INSULIN
RESISTANCE
BALANCER

NEW
PRODUCT

Gluco Optimizer may behave similarly to Insulin-like growth factor (IGF-1), a key hormone essential to optimal wellness that naturally decreases with aging and chronic stress. IGF-1 reduces inflammation, supports immunity, and aids in digestion, energy production, muscle growth, and blood sugar metabolism.

This product contains a proprietary blend of herbs, plus fulvic acid extracts which protect the herbs from damage and drive the nutrients to your cells quickly. During years of product development, these ingredients were precisely formulated in the needed proportions. Altering these ratios would render Gluco Optimizer less effective.

Upon introducing Gluco Optimizer, allow about 3-4 weeks for the body to adjust to the product and experience optimal benefits.

Key Benefits

- Supports blood sugar balance
- Can improve cognitive mental capacity
- Aids in digestion
- Promotes healthy cellular function
- Helps to protect against heart disease
- Supports increased muscle mass
