

ADVANCED TUDCA

DRAINAGE & LIVER SUPPORT

NEW
NAME

Same Formula

TUDCA (tauroursodeoxycholic acid) is a water-soluble bile acid. It helps stimulate the release of bile into the gut, promoting toxin elimination.

Though TUDCA is naturally found in the body's bile, it's only present in small amounts. Our TUDCA is expertly synthesized to guarantee the purity and potency. Animal sources of the compound are prone to contamination with hormones, chemicals, and other toxins.

To make Advanced TUDCA, we combine TUDCA with N-acetyl cysteine (NAC); humic and fulvic acid extracts; and melatonin to maximize the potency. Melatonin serves as a driver to help deliver the product into target areas, particularly the liver. In this formulation, it won't cause sleepiness.

Key Benefits

- Enhances liver and digestive function, including after gallbladder removal
- Supports Phase I and II liver detox, as well as liver drainage (sometimes called Phase III)
- Encourages glutathione synthesis to provide antioxidant support

Dosage Guide

- As part of the Detox Starter Protocol, see the charts for Phases 1 to 4 for doses and timing
- Standard: 1 capsule twice daily
- Aggressive: Up to 2 capsules twice daily
- Sensitive: Take 1 capsule daily with food
- Child (50–125 lbs.): 1 capsule twice daily
- Toddler (< 50 lbs.): ½ capsule twice daily
