The RodecoWay

” We create space for play that develops children and business”

What we do

- We create, produce and install safe and secure playgrounds and waterparks for indoor and outdoor use, where children can have fun and develop along with their parents.
- A place to meet. A place where people and business grow and develop together.
- All our playgrounds are custom designed, corresponding to appropriate ages and created with a mix of function and adventure to make a memorable play experience.
- We design and build our playgrounds with many different environmentally friendly materials, such as glass fibers, rubber, steel, foam, wood always of the best quality.

More than just a playground...

- It attracts families!
- It improves the company image
- It helps towards a quieter and better ambience and shopping experience
- Visitors stay longer in the shopping mall and therefore it increases revenue

Flooring materials

Popup floor Standard

Shock absorbing Popup floor
TUV tested for up to 175cm
fall height

Popup floor Basic

Precut adhesive floor printout
in high tolerance film

Linoleum floor in roll precut and with
preapplied decorative floor decals

Rodeco's Popup floor

Unique floor solution delivered in sections for quick and movable installations

Rodeco's Popup floor
section profile

20mm EPDM rubber + PU-binder
with UV-filters for outdoor use

3mm fiberglass layer

Interior use: Birch plywood

Exterior use: 'Extreme Medite Tricoya MDF' with
outstanding water resistance (25 years garanty for
use under water) <https://ceos.se/tricoya-mdf>

Environment, Sustainability and Safety

Sustainability is for us the ability to deliver products that, with minimal maintenance last in time.

CERTIFICATIONS AND SUSTAINABLE DEVELOPMENT

With our ISO certifications we ensure that our business conforms to the requirements of the latest quality process standards set by the International Standards Organization.

Rodeco is accredited by SWEDAC. Accreditation means that assignments are carried out impartially, correctly and are based on internationally recognized standards.

MATERIALS

We select and employ preferably materials of European origin and sustainable primary production. Our EPDM granules are produced in Europe from raw material.

We handle and manufacture fiberglass resin parts in accordance with all precautions and health directives.

As priority, we choose wooden material components from certified production as PEFC or FSC. Our components in steel are in stainless steel and coated with an innovative thermo-plastic process.

SAFETY

Rodeco designs and builds play areas that always follow and fulfil the European Norms for Children Safety SS-EN 1176. We can also offer our products in two fire resistance classes: Cfl-s1 and Bfl-s1. These certifications are made by the Swedish Research Institutes RISE.
