DeGray Lake Resort State Park, nestled in the foothills of the Ouachita Mountains, encompasses 938 acres on the north shore of DeGray Lake. For the bird-watcher, DeGray offers a number of bird habitats, from the mixed pine and hardwood forest of the camping areas to the golf course, field and marshy coves behind the visitor center. To see the greatest variety of birds, we suggest you walk the **Green Heron Trail** behind the visitor center. The trail winds through an old overgrown field, past ancient oaks and around shallow coves.

Many birds are found only in certain habitats; therefore, we suggest you consult a field guide for the bird's appropriate habitat. Field guides may be purchased at the visitor center and lodge gift shop. Be sure and visit the bird viewing area at the visitor center for ideas on how you can attract birds to your area.

Seasons occasionally overlap; thus, some birds may arrive earlier and/or stay longer than the months indicated. If you identify a bird not included on this list, please report it at the visitor center so that we may use the information in revising this checklist.

NOTE: List compiled by Wallace F. Keck and Duane Moren, Park Naturalists, DeGray State Park (1987). Special assistance was given by Max and Helen Parker. List was updated in 1994, 1997 and 2006. For more information, call 501-865-2801, or write the park at the address below.

Park Location: To reach the park, take Ark. Hwy. 7 north from I-30 just six miles; or take Hwy. 7 south from Hot Springs—approximately 21 miles to the park entrance.
