8. Tulip Tree

Volunteer Opportunities

If your trails have provided you with beauty and recreation, please give something back by becoming a trail volunteer. Volunteer trail maintenance can be as easy as picking up litter and cleaning small debris off the trail. Stop by the visitor center or call (870) 932-2615 if you are interested in helping.

Interpretive Programs

Interpretive and educational programs are available year round. Programs may include guided nature hikes, slide shows, demonstrations, special events and weekend programming. Schools, scouts and other organized groups are encouraged to request special programs year-round with advance notice.

NOTE: To preserve scenic beauty and ecology, fences and warning signs have not been installed in some park locations. Caution and supervision of your children are required while visiting these areas.

Welcome to Lake Frierson State Park

Lake Frierson State Park is a popular fishing, recreational and environmental education area. The park fronts the western edge of picturesque Crowley's Ridge, a geological phenomenon which rises 100-200 feet above the surrounding countryside and stretches from southern Missouri to the Mississippi River at Helena, Arkansas.

Trail Description

Dogwood Lane Trail is approximately 1/2 mile long, self-guided interpretive trail with a 1/8 mile spur that leads to the visitor center. Lake Frierson State Park has more dogwoods than any other state park its size and bursts into a wild array of dogwood blossoms each spring. Along this trail you should also watch for deer, squirrel, raccoon, opossum, snake, box turtle, songbirds and wildflowers.

Crowley's Ridge has a distinct type of forest which most nearly resembles that of the Appalachians, and exhibits quite a variety of species. On the drier top will be found the oak-hickory combination of much of the Ozark region, and where it joins the river flood-plains below, the forest will resemble that type. However, on the more sheltered north slopes and spreading out from these will be found a richer assortment of broadleaf trees than anywhere else in the state. This includes the tulip tree; cucumber tree; basswood; white oak, northern red oak, and chinkapin oaks, several hickories; ashes; maples; cherry; walnut, butternut; and beech. This is the only area in the state where the tulip tree (yellow poplar) occurs naturally.

Trail Rules & Regulations

All plants, animals and rocks found in the park are protected by law. Please don't disturb them, just appreciate them and leave them for the next visitor to enjoy.

“Take nothing but photographs,
leave nothing but footprints.”
