

# MÖDERE® FACT SHEET

## MODERE CELLPROOF SUNLESS TANNING FOAM

Personal Care | Skin

### Product Overview

The only self-tanner infused with BioCell Collagen® CG, Modere® CellProof Sunless Tanning Foam is a lightweight, quick drying formula that works with skin's own protein to develop a beautiful, authentic-looking, true-color in just 4-8 hours. Collagen/HA Matrix® Technology delivers collagen peptides and hyaluronic acid to hydrate and moisturize for a more even, streak-free application while promoting visibly younger looking skin.

### Product Benefits

- Develops a natural-looking, streak-free color in 4-8 hours
- Hydrates and moisturizes for long-lasting true color
- Helps smooth skin for improved texture and even application
- Fades the appearance of skin imperfections
- Helps even the appearance of skin tone
- Promotes vibrant, youthful looking skin
- Promotes the look of elasticity

### Product Details

Dermatologists and skin care professionals agree that avoiding prolonged sun exposure is the best way to avoid visible signs of premature aging, but it's hard to pass up the healthy-looking glow of a natural tan. With Modere® CellProof Sunless Tanning Foam you can have it all — beautiful color and visibly younger looking skin — thanks to DHA and erythrulose self-tanners plus patented BioCell Collagen® CG.

Modere CellProof Sunless Tanning foam is a quick drying, clean label formula that won't transfer to clothes and features a natural coconut vanilla aroma to make you feel like you're in the tropics. It is safe for both your face and body. Keep skin looking youthful in between applications with Modere CellProof Body Firming Foam and the rest of the Modere CellProof collection.

### Directions/Usage

Pump tanning foam into hands and apply in circular motions on clean, dry, exfoliated skin. Thoroughly wash hands after application and wait until skin feels dry to the touch before getting dressed. Layer additional applications for a deeper shade and/or maintenance. Wait until CellProof Sunless Tanning Foam has fully dried before using CellProof Body Firming Foam or other moisturizers.

**Caution:** This product does not contain a sunscreen and does not protect against sunburn.

### Key Ingredients

- BioCell Collagen® CG
- DHA
- Erythrulose
- Coconut extract
- Vanilla extract

**INGREDIENTS:** Water, dihydroxyacetone, propanediol, decyl glucoside, glycerin, erythrulose, sodium olivate, sodium metabisulfite, hydroxyacetophenone, 1,2-hexanediol, caprylyl glycol, magnesium stearate, hydrolyzed chicken cartilage extract\*, citric acid, fragrance, potassium sorbate.
