

AZURE MIGRATION WITH MONOCEPT

CLIENT BACKGROUND

The Client is a strategic provider of technology services and solutions designed to maximize organizational efficiency and business offering tailored solutions for Oracle technologies, specializing in Financials, Procurement and Analytics, as well as application development and QA services.

MIGRATION TO AZURE ?

The client has built several applications which are hosted on a private cloud, but the huge costs of maintenance & scalability issues triggered the need to switch over to Azure cloud. Monocept helped them in their cloud migration journey by conducting 2 day workshop to assess the dependency of servers , various VMs , connectivity issues , and suggesting the best way forward - Rehost , Refactor or Rearchitect

PROBLEM STATEMENT

Monocept's client, a leading strategic provider of technology services and solutions required to migrate it's existing application from a private cloud to Azure cloud realizing maximum cost benefits

APPROACH

The client reached out to Monocept because of our expertise in migrating applications to Azure cloud :

- In the assessment phase, Monocept first defines the scope of the engagement and then identifies the then specific application for modernization. Then, Monocept reviews the application architecture, resource usage, and integration with other systems. Finally, We perform a GAP analysis and give recommendation.
- The 2nd phase - we run assessment tests to check Pre & Post migration scenarios for any breaking & behavioral changes.
- The 3rd phase - we migrate one application and do fail- safe tests to ensure smooth migration journey
- The 4th phase - Optimization by Dynamic Uptime, Scaling and Scheduling , Leveraging Purchase Commitments & Right-Sizing and Feature Evolution.

BENEFITS

Using Monocept Azure migration journey , the client was able to migrate successfully to cloud and realized maximum ROI in timely manner. We also provide a 60- day SLA post migration to ensure all the business teams are well - versed with cloud.
