

POSTSAVER®

Do It Once, Do It Right – Job Done

With 26 years of heritage and 20 years of testing, you can trust Postsaver products

Who are we?

Brothers, Richard and Jim George, founded Postsaver in 1994 after experiencing issues following fence maintenance at home. Their background in the plastics industry proved the perfect foundation to create a product which, following BRE testing, is guaranteed for at least 20 years. And, almost 30 years later, their business is still going strong and still growing.

The initial product may have been the Postsaver Pro-Sleeve but the product portfolio now includes a Pro-Sleeve Wrap for larger posts, Pro-Set Post Fixing Foam, a light-weight and super-strong alternative to concrete and a host of other supporting products which make fence post installation a breeze.

Proven Technology

HOW POST ROT PROTECTORS WORK

Dual-Layer Rot Prevention Technology

Postsaver Pro-Sleeves feature a dual-layer barrier protection system, that when heated, shrinks onto the post creating a long lasting, high-performance, air and water-tight seal.

Locks Out Everything Required for Decay

This seal is the critical element which locks out all the factors required for decay to occur including moisture, fungi and oxygen at the critical ground-line (up to 6 inches or 150mm below ground) of the post.

Rot Can't Occur

When all the factors required for rot and decay are locked out of the post, conventional rot cannot occur. This allows us to guarantee fence posts for 20 years*.

Postsaver Post Rot Protection

Guaranteed to Prevent Rot

Pro-Sleeve

Pro-Sleeve - Commercial Use Only

Wooden fence and gate posts rot at the ground-line section because of oxygen, fungi & moisture in the soil. This damaging combination is only present at the critical 'ground-line' section and typically extends 150mm or 6" below the ground level. Deeper in the ground oxygen supply is limited, so wood-decaying fungi do not survive.

Postsaver Pro-Sleeves feature a dual-layer barrier protection system that when heated, shrinks onto the post creating a long lasting, high-performance, air and water-tight seal. This ensures the sleeve excludes all the factors required for decay, locking preservative in and locking moisture, oxygen and fungi out. Preventing costly ground-line rot in your wooden posts.

Postsaver Pro-Sleeves come in a range of sizes to fit any post size. See table below for Pro-Sleeve size recommendations.

Product Code	Fits			
	Round Post (mm) ●	Square & Rectangular Post (mm) ■ ■	Round Posts (Inches) ●	Square & Rectangular Post (Inches) ■ ■
1	Wrap & Tack 5 Meter Roll Cut to Size & Fit to any Post			
2	100 1/2 rnd 75/100mm		4" Half Round 3"	
3	90mm	75 x 75	3.5"	3" x 3"
4	100mm		4"	
4.5	120mm	90 x 90		
5	125mm	100 x 100, 125 x 75	5"	4" x 4", 5" x 3"
6	140mm	125 x 100, 150 x 75	5.5"	5" x 4", 6" x 3"

Pro-Wrap - All Users

With three variations to fit all post sizes, Pro-Wraps are our next generation product featuring all of the benefits and technology from our Pro-Sleeves, but with a reduced range complexity allowing you to carry less stock and satisfy more customers. They feature our wrap peel and stick system which allows to you to effortlessly apply them to any post size before heat shrinking them to create our guaranteed dual-layer barrier system.

Postsaver Retail POS and Display Units

Our range of Pro-Wrap products are now available in an eye catching retail display unit. Featuring a three tier stand and an interactive post display, the unit is designed for maximum sell through with minimal retailer input.

Designed with the retail customer in mind, the new point of sale allows customers to easily understand the benefits of the Postsaver post rot protector.

Product Code	Fits			
	Round Post (mm) ●	Square & Rectangular Post (mm) ■ ■	Round Posts (Inches) ●	Square & Rectangular Post (Inches) ■ ■

Postsaver Pre-Sleeved Posts

Ready to Use Long-Life Posts

Pre-Sleeved Fence and Gate Posts

Ground line rot and decay in the upper 150mm (or 6 inches) of the ground is the number one cause of timber post failure. Postsaver Post Rot Protectors feature a dual-layer rot shield technology that, when heated, shrinks onto the post creating a long lasting, high-performance, air and water-tight seal. This ensures the post protector excludes all the factors required for decay. By locking preservatives in and locking moisture, oxygen and fungi out, this prevents costly ground-line rot in wooden posts.

For many years Postsaver technology has been adding significant value to projects and provide customers with confidence in the longevity of their posts. However, time is our most valuable commodity, and the correct application of a Postsaver Post Rot Protector can add to the cost of a project. Pre-sleeved Postsaver posts now save time and money with ready to use protected posts.

The Postsaver guaranteed 20 year long life posts have gone through a tandalised UC4 treatment process, and then fitted with the rot protector for a 2ft burial depth. Application of the post protector is done via a state-of-the-art Pro-Mill machine which can process up to 400 posts per hour ensuring each post is fitted correctly with the unique dual layer rot prevention technology.

These new premium, pre-sleeved posts can be ordered in a range of shapes, sizes, and lengths with the added benefit of having them delivered directly to site. No more concerns or hesitation about the application process, there is now a Postsaver long life post that is ready to use or to sell as part of any fencing and landscaping range.

POST ROT PROTECTOR +PLUS

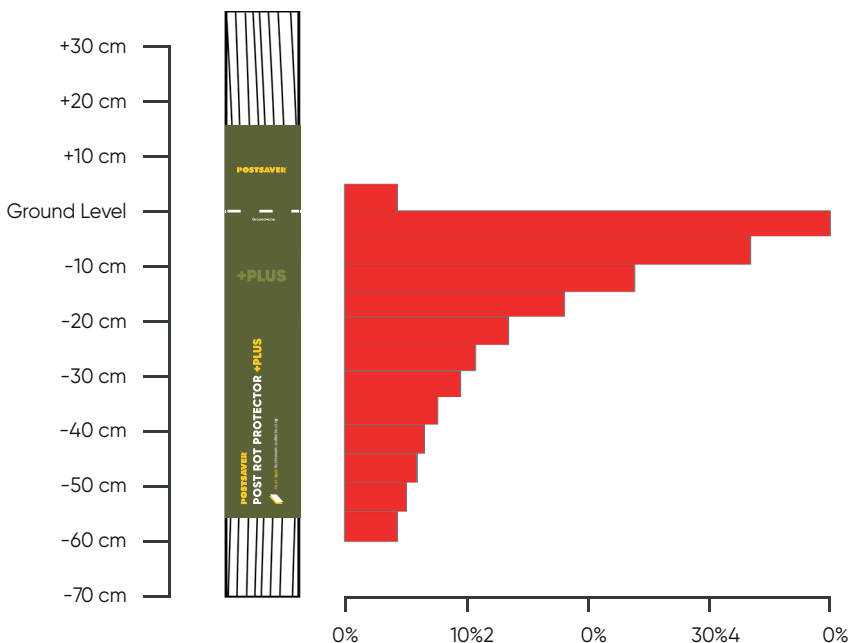

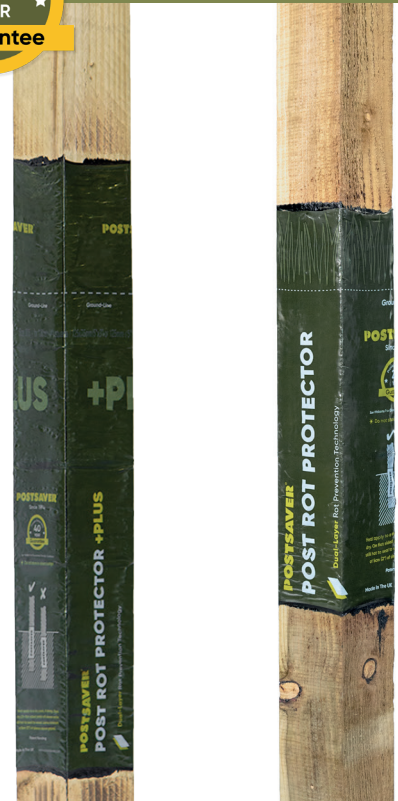

DOUBLE LENGTH - Improved Protection

Postaver Rot Protection +Plus is a rot protection sleeve that's been developed for the professional specifier market where post life of 40+ years is expected. Postsaver +Plus is based on our larger, heavy duty Polesaver rot protection sleeve which has been successfully used for over 25 years to protect safety critical power and telecom poles around the world from wood decay (please see www.polesaver.com).

Postsaver +Plus when used with UC4 water based copper wood preservative offers an excellent alternative to Creosote or C.C.A. wood preservative treatment.

Postsaver +Plus, like the proven Polesaver product, extends deeper below ground than our standard protection, significantly reducing the likelihood of wood decay. This results in an expected post life of 40+ years on UC4 treated posts and 20 years when used on untreated posts in environmentally sensitive areas.

Postsaver Pro-Set Post Fixing Foam

Pro-Set

Postsaver Pro-Set Post Fixing Foam is the convenient alternative to concrete post mix and makes installing fence posts a breeze. Plus it's an environmentally friendly solution, with less than half the CO2 emissions of concrete.

Postsaver Pro-Set
1.35kg

2 bags of concrete
40kg

- ✓ Weight of Pro-Set 1.35kg vs Concrete 2 bags 40kg
- ✓ 3 boxes of Pro-Set is equivalent to 1 pallet of concrete
- ✓ 1 pallet of Pro-Set is equivalent to 32 pallets of concrete

Pro-Set is ultra-strong and will hold fence posts securely in place and can withstand the same lateral forces as concrete.

- ✓ One 1.35kg bag sets two fence post
- ✓ Ready mixed solution – no water required
- ✓ Suitable for use with wood, vinyl, steel & composite posts
- ✓ Expands quickly and reaches full strength in just 90 minutes

Postsaver Creostain for Sheds & Fences

Postsaver Creostain is a water-repellent oil-based professional wood treatment. Protecting exterior wood against water damage and preventing cracking, twisting and swelling. Postsaver Creostain has a traditional appearance when dry and is suitable for rough, sawn or smooth timber. Postsaver Creostain is ideal for exterior fences, sheds and barns. Creostain has similar physical, water resistant and application characteristics to the traditional Creosote, but contains no biocides.

Suitable for application with a brush or spray and available in two colours, light brown and dark brown. A deeper colour may be attained by applying further treatments.

Features & Benefits

- ✓ The oil-based properties of this product improves the grain definition of treated timbers
- ✓ Suitable for use on exterior timbers
- ✓ Enhanced water repellence
- ✓ Improves grain definition
- ✓ Restricts weather damage
- ✓ A deeper colour may be attained by applying further treatments
- ✓ Apply liberally, soaking the timber to achieve best results
- ✓ High VOC
- ✓ Apply with a brush or roller

Postsaver Tools

Committed to making the whole job easier, Postsaver has developed a range of heavy-duty tools, from post hole diggers, rammers and other fencing accessories. All these products are approved and show the 'Postsaver Tool' badge.

Postsaver's range of gardening tools are designed to be tough, durable and great value for money. They are all designed with ease of use and great ergonomics in mind, making them suitable for anybody who requires a quality tool, from the occasional gardener to the professional groundsman or landscape gardener.

Postsaver Tools

Postsaver Post Hole Digger

- ✓ Hardened and tempered carbon steel spade head with re-enforced shaft
- ✓ Carbon steel shaft & handles coated in plastic to prevent rust
- ✓ Epoxy powder coated spade heads to prevent soil adhesion & rust
- ✓ Dimensions: Height 1480mm, spade heads 240 x 150mm

Postsaver's heavy duty long post hole digger features long carbon steel handles with a re-enforced shaft mated to a hardened and tempered steel shovel head. Double soft grip handles on the shaft and the handle add to user comfort while the epoxy-coated steel tines reduce soil adhesion and increase rust resistance.

Our heavy-duty post hole digger is designed for digging fencing post holes. It cuts a cleaner hole and removes soil easier and quicker than using a spade. Simply drive the hole digger into the ground to create a hole and then pull the handles apart to close the jaws and scoop out the earth.

Postsaver Fence Post Rammer

- ✓ Carbon forged steel - hardened and tempered for strength & durability
- ✓ Powder coated to protect from rust and erosion
- ✓ Thicker handles for better grip
- ✓ Dimensions: Weight 14.5kg, Length 660mm, Width 160mm

Ideal for power driving posts and ensuring safety and efficiency, the Postsaver heavy duty 14.5kg post rammer is the perfect tool for the job. Designed for posts up to 6" in diameter this HD powder coated steel post rammer has 27mm thick integral grip handles for comfort.

Postsaver Fence Post Rammer	POSTRAMMER

Postsaver Yard Broom

- ✓ Heavy duty 45cm head
- ✓ Dual bristles: stiff inner black bristles for large debris, soft yellow outer bristles for the fine debris
- ✓ Steel handle coated in PVC for increased strength
- ✓ Easy grip comfort handle

The Postsaver Heavy Duty Broom is the perfect tool for the job, designed for making short work of any clean up, its large 45cm head is fitted with dual stiff & fine bristles ensuring both large and fine debris are picked up with one pass of the brush. A steel, PVC coated handle with comfort grip adds to user comfort while also providing strength and performance.

Postsaver Yard Broom	BROOM

Postsaver Fencing/Drainage Spade

- ✓ Hardened and tempered carbon steel fork head with re-enforced shaft
- ✓ Carbon steel shaft & handle coated in plastic to prevent rust
- ✓ Epoxy powder coated fork head to prevent soil adhesion & rust
- ✓ Dimensions: Height 1140mm, fork head 280 x 190mm

Postsaver's heavy-duty post-hole grafting drainage spade features a plastic-coated carbon steel shaft mated to a hardened and tempered steel digging head. Double soft grip handles on the shaft and the handle add to user comfort while the epoxy-coated steel tines reduce soil adhesion and increase rust resistance.

Postsaver Heavy Duty Post Hole spade is designed for digging fencing post holes. It cuts a cleaner hole and removes soil more easily and quickly when compared to using a standard spade.

Postsaver Tools

Postsaver Long Handled Trenching Shovel

- ✓ Long fibreglass handle with re-enforced shaft
- ✓ Carbon steel shaft & handle coated in plastic to prevent rust
- ✓ Epoxy powder coated spade head to prevent soil adhesion & rust
- ✓ Dimensions: Height 1480mm, shovel head 290 x 120mm

Postsaver's heavy duty long handled trenching shovel features a long fibreglass handle with re-enforced shaft mated to a tempered and hardened steel shovel head. Double soft grip handles on the shaft and the handle add to user comfort while the epoxy-coated steel tines reduce soil adhesion and increase rust resistance.

With a specially designed narrow blade and a long fibreglass tubular handle, the shovel is ideal for digging deep narrow trenches and holes.

Fence Armor® Fence Post Protectors

Postsaver is proud to partner with Fence Armor to guarantee complete protection for your posts year after year. Fence Armor's post protection steel guard protects the ground lying part of the post from trimmer damage and completes a stylish finish for the job.

The #1 Choice is Steel

Abundant, strong and flexible, steel accommodates every post material and size. This makes steel the best defence for any post.

Hard Core Protection

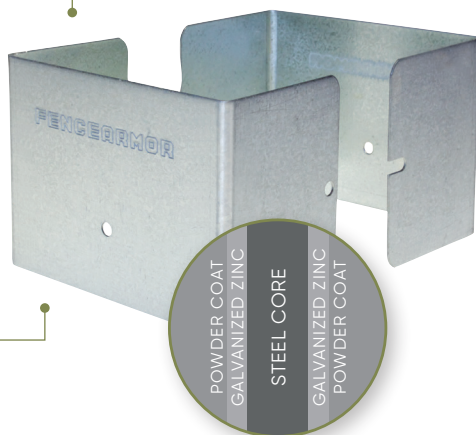

Starts with 100% American galvanized steel. It's then dipped in zinc, followed by a durable, powder-coat finish.

365/360° Protection

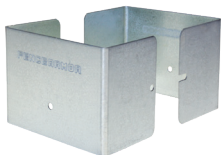

Fence Armour's two-piece design offers additional side slots to accommodate post expansion and contraction during seasonal weather.

Engineered Structure

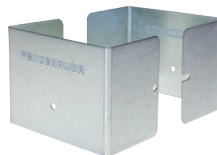

The patented corner radius is designed to increase structural integrity, while reducing wear and tear on grass trimmer lines.

What our Customers Have to Say

"We have been using Postsaver for numerous years and I have to say we will not as a company install any size of wooden post without using them. I can honestly say over the last 15 years we have never been back to any of our installations because the fence post has rotted."

"We get nothing but positive feedback when using the system."

"We will never install a post without Postsaver."

Brian Henderson, Henderson Fencing

"We recommend using Postsaver sleeves to all of our customers who purchase timber posts from us or who would like us to install timber posts for them. They are very easy to fit and the small cost per sleeve versus the extended life span of the fence makes it a no brainer."

Kevin Clarke, Clarke Fencing
