

Logging in to Windfall Mobile Pro

Log into Windfall Mobile Pro

- After Activation occurs the login screen will appear.
- Enter the same User ID and Password from Windfall.
 - **Wireless Mode Option.** If a Wi-Fi connection in the warehouse is available Windfall Mobile can operate in Wireless mode which will instantly send transactions to the Windfall Basic system. Wireless mode can be switched off allowing the user to log in and complete transactions without an internet connection. Once back in a Wi-Fi area the user can select Data Transfer to transfer all the transactions to the Windfall Basic system.
***Note: For the first login Wireless Mode must be turned on in order to verify the credentials. After the first log in Wi-Fi can be disabled.**
- Once Logged in the Activities Screen will appear.

Activities Screen

- At the bottom of the Activities Screen, there are three options:
 - Summary
 - Data Transfer
 - Setup

- Tap the Summary Button.

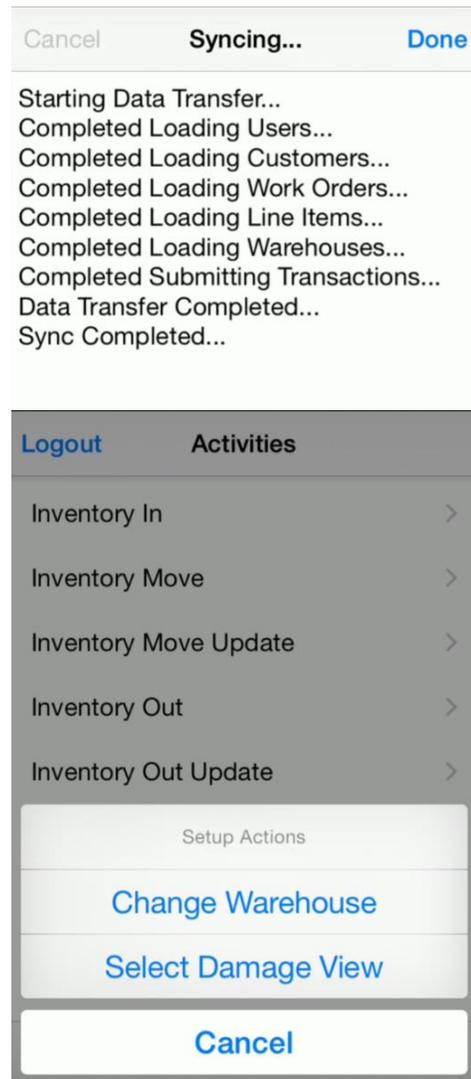

- The Summary Screen appears. This is where the total number of items that have been processed will appear when using Batch Mode.

- Tap Done to go back to the Activities Screen.

Summary Data Transfer Setup	

Summary	Done
Total	0

- Tap Data Transfer.
- This will transfer all data to The Windfall Warehouse System if Batch mode is active.
- **Note: Wireless must be available to utilize this function.**
- Tap Done Button in blue when data sync is complete.
- Tap Setup.
- Tap Change Warehouse.
- If there is more than one warehouse this is where the option to switch from one warehouse to another is located.
- Tap on the selected warehouse.

- Tap Setup.
- Tap Select Damage View.
- Options for either the Wheel or Button View appear.
- Select preference as this option will be used when entering exceptions for inventory items.
- Tap Save.
