TP4X Disinfectant Mister

Professional Disinfectant AND Great Value

Portable and lightweight, making it ideal for almost every industry.

Key Features

Provides a versatile, quick and even application of disinfectant. Misting is the most efficient and productive way to sanitize and disinfect both large areas and hard to reach places.

Equipped with a 4-gallon tank, 17' solution hose and a spray nozzle with two different size tips to accommodate different dwell times. A 33' cord, optional 16" extension wand and transport cart, make this unit perfect for almost every industry.

This efficient machine can be used with almost every disinfectant. An optional vacuum/solution hose and hand tool turns this mister into an extractor, making it a versatile and economical piece of equipment.

TP4 Mister
(shown with optional cart)
