**COME**  
ABOUT

## PREMIER MANUFACTURERS OF MOVING AUDIO AND VISUAL SOLUTIONS

We have crafted the most diverse range of moving audio and visual solutions aimed towards providing a unique experience for our customers.

All of our products are designed and manufactured in our UK and US facilities where we have used our state of the art production processes to create a product that is unmatched in both quality and reliability. Our team is dedicated to consistently improving our existing product lines and embracing innovation to design functional and reliable mechanisms that discreetly integrate into your existing space.

**“THIS IS THE FIRST PRODUCT IN MANY YEARS  
WHERE I WAS SUPER IMPRESSED WITH THE  
QUALITY. IT PERFORMED AS ADVERTISED, AND  
IT JUST EXUDES HIGH-END CRAFTSMANSHIP.”**

**-JIMMY COINER  
VISION SYSTEMS INC.**

# **HOME** ADVANTAGE

Keeping our entire production process in house allows us to assess the quality of our product at every manufacturing stage from design to delivery. This helps us ensure that the mechanisms we produce all meet our exacting standards, every time.

# **BESPOKE** CREATIONS

Can't see a product that fulfils your specifications?

Our in house designers can create bespoke mechanisms that will seamlessly integrate into your project.

We manufacture our bespoke mechanisms in-house to ensure they meet our exacting standards.

# **THOROUGHLY** TESTED

Our mechanisms have been tested alongside marine industry professionals to develop a range of products specifically designed for marine applications. This ensures that every mechanism we create can withstand the harsher environments that present themselves within nautical environments.

Marine locking mechanisms ensure that every one of our products remains rigid when they're mounted

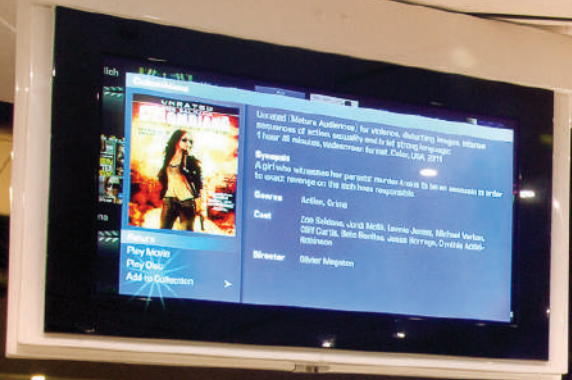

# MARINE SEALED

All our marine outdoor solutions are built to withstand more demanding conditions as they are typically mounted on the exterior of yachts.

Stainless steel components and dedicated weather sealing ensure that our mechanisms internals remain protected.

The gloss coating which can be colour matched to your yacht also protects the mechanism from dirt and debris, while the IP rated control board and marine locking system keeps the mechanism fully functional and secure in open waters.

# **PROMINENT** PROVENANCE

Every part of every mechanism is designed, manufactured and assembled in house. Simple.

Our mechanisms enable displays to be fully concealed and revealed on command

# **PRECISELY** CRAFTED

Experienced teams collaborate to craft precise mechanisms, created to meet our exacting specifications.

Indoor and outdoor variations of each of our mechanisms are available to meet their contrasting operational requirements

Discreet sliding panels can conceal displays within wall cabinetry to be revealed on command

Rooms onboard can be transformed into marine theatres with concealed projector lifts and drops

INFORMATION

## **SPECIFICATION TOOLS**

At Future Automation we try to make the specification phase as easy as possible. To this end we have developed a number of online specification tools to help streamline the process.

### **PROJECTOR DROP SPECIFICATION TOOL**

Available from the 'Tech/Downloads' section of any Projector Drop page on the Future Automation website or the 'Tools' page, this allows the customer to input the dimensions of their specified projector and in turn receive a clear answer about the required size of Projector Drop mechanism.

### **CABINET SPECIFICATION TOOL**

Available from the 'Tech/Downloads' section on any TV Lift or Heavy Duty TV Lift page of the Future Automation website or the 'Tools' page, this allows the customer to input the dimensions of their specified television and in turn receive a clear answer about the required size of TV Lift. The tool also generates a personalised tech sheet, showing the customer their required internal cabinet dimensions.

# **HOW** TO ORDER

When ordering, Future Automation products are separated into three categories.

## 'STANDARD' PRODUCTS

**Standard Products** are those built to the dimensions/specifications listed on the Future Automation website. These products will feature the **Standard Product Icon** shown above.

### ORDERING DETAILS

Orders may be subject to production lead times, depending on current manufacturing workload.

## 'CUSTOMISED' PRODUCTS

**Customised Products** are based on Standard Products, but feature changes to size, functionality or finish as specified by the customer. These products are built to order and will feature the **Customised Product Icon** shown above.

### ORDERING DETAILS

Orders will be subject to design and production lead times.

TV/Projector brand and full model number **must** be specified when ordering. Failure to provide details may result in design and production delays.

Orders will subject to specific deposit and returns conditions. See '**Deposits and Returns**' section for further information.

## 'BESPOKE' SOLUTIONS

**Bespoke Products** are one-off designs, engineered to an exact specification agreed on by the customer. These products, which are designed and built to order, typically have longer design and production lead times. These products will feature the **Bespoke Product Icon** shown above.

### ORDERING DETAILS

Orders will be subject to design and production lead times. Individual specification will need to be discussed directly with our design team.

Customer sign-off on CAD drawings will be required in order to proceed to manufacturing.

Orders will subject to specific deposit and returns conditions. See '**Deposits and Returns**' section for further information.

## **SAFETY STANDARDS**

At Future Automation we take health and safety seriously and are committed to ensuring current safety standards are not only met but raised. All of our manufacturing processes fully comply with the latest Health and Safety regulations.

## **PRODUCT RESELLERS**

Future Automation Resellers are responsible for the safe installation of our products and are required to complete both a risk assessment and method statement prior to their installation to ensure that the product is fit for purpose and that the user(s) are fully aware of its operational requirements and risks involved in its use.

It is important that everyone who is to connect, install or use a Future Automation product has had the necessary information and access to the product instructions / user manual. Future Automation products are not intended to be used by young children or infirm persons without supervision. If there is visible damage to a product it must not be used and reported to the installer.

## **SAFETY PRODUCTS**

There are a variety of safety products available that can be wired into a Future Automation mechanism that include, PIR sensors, buzzers, shock sensors, motion sensors, and cut-off switches. In addition a Future Automation product can be controlled by permanent operation of a switch (Dead man's / vigilance switch) for additional safe operation.

Additional consideration for pinch points and safe cabinet design should also be considered when installing a Future Automation product.
