CANVAS PRINTING SERVICE

# **A PERFECT FIT EVERY TIME**

Crafted in our manufacturing facilities using durable premium redwood timber, our custom and bespoke canvasses are sustainably sourced from FSC/PEFC certified woodlands. Each canvas is hand-stretched by our print production team and crafted to mount perfectly on our picture hanging mechanisms.

Here at Future Automation we have tested numerous variations of canvas stock to determine which produce an image of the highest quality, to match and reflect the quality of the mechanism that it will be attached to. All of our canvas prints are produced on a premium 350g/m<sup>2</sup> semi-gloss satin canvas, famed for its faithful colour reproduction and acid-free cotton/poly blend.

Our print production team are responsible for ensuring that each and every print that we produce meets our stringent quality control standards, our print production team will also perform visual and practical tests on every canvas to confirm its print quality and finish before it is shipped.

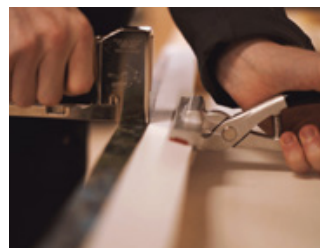

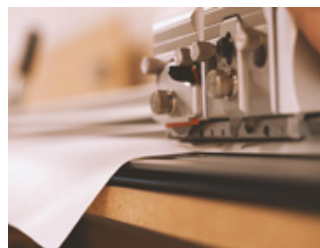

## HIGH QUALITY FRAMES

High quality certified redwood timber frames are manufactured on site in Lincolnshire before it is shipped to our Bedfordshire facilities. The thick 44mm timber creates a sturdy and robust framework for larger canvasses, making it a perfect choice for large scale prints.

Each frame has been kiln dried and is knot free to form a strong and durable frame for our canvas prints, while finger jointed corners form a strong and permanent bond between each edge of the frame.

## HANDMADE IN-HOUSE

Our print production team will assemble and hand-stretch your printed canvas to the timber frame, utilising traditional woodworking processes to form a piece of quality and durable artwork for a residential or commercial space.

# COMPATIBLE WITH OUR ENTIRE PICTURE MECHANISM RANGE

Every canvas we produce is created to perfectly fit every one of our picture hanging mechanisms.  
You can choose between our wide variety of movement styles and order a custom made canvas  
that has guaranteed compatibility for a frustration free installation.

## **CHOOSE YOUR ARTWORK**

Investing in a large format canvas printer offers clients the opportunity to have their own artwork printed.

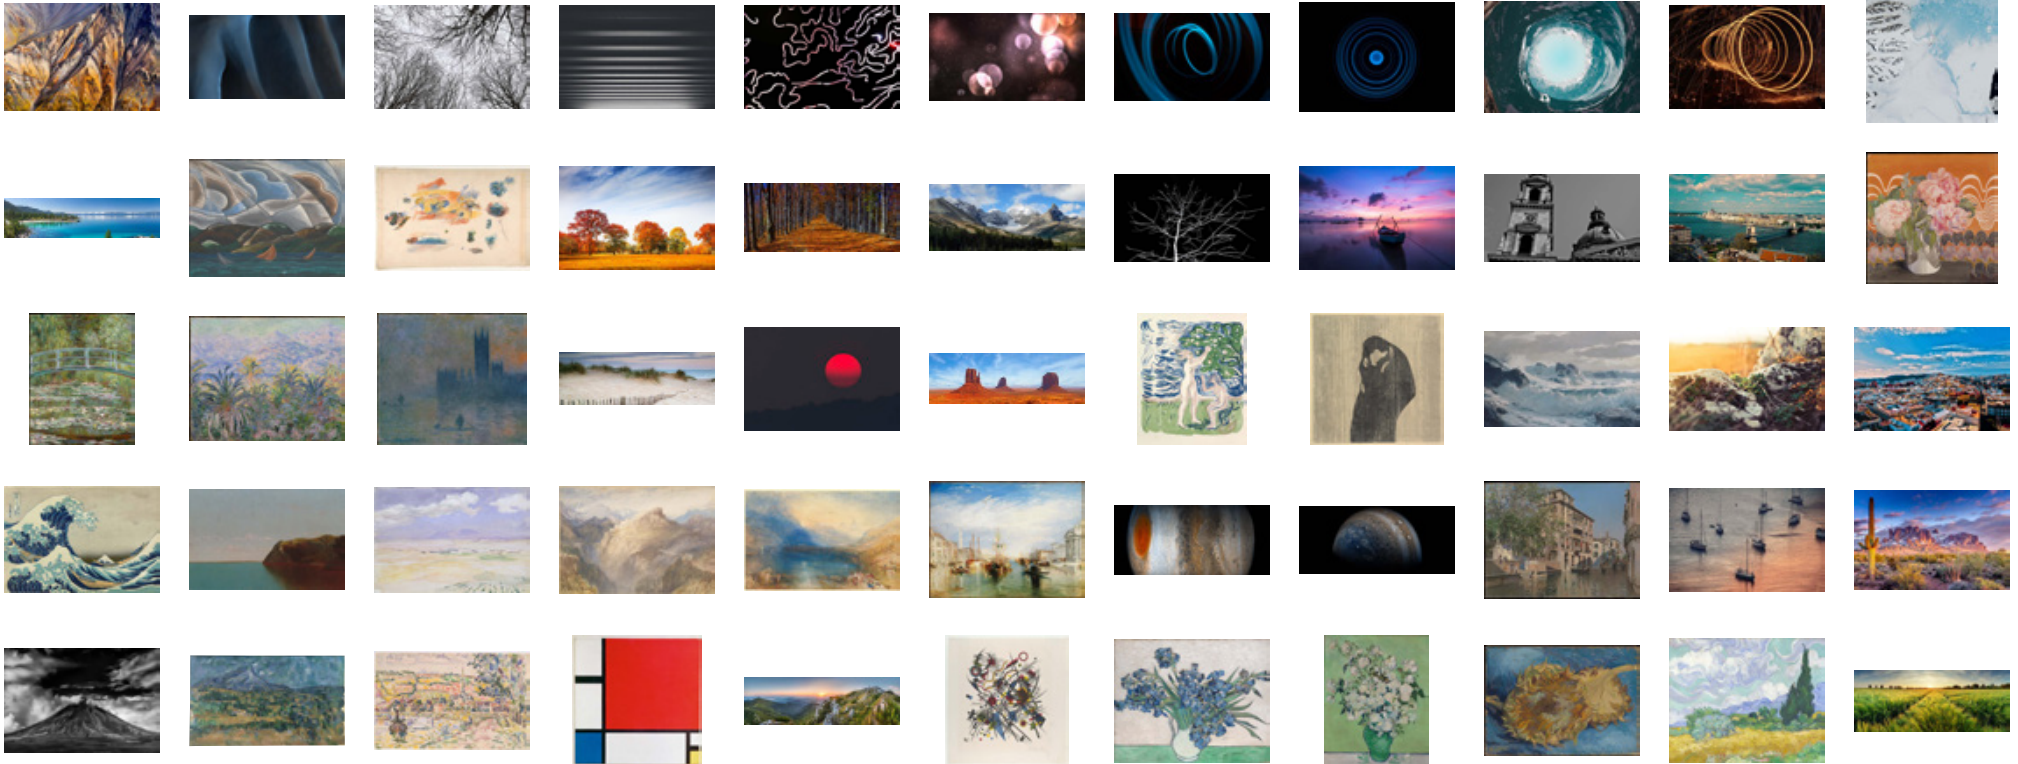

Send your artwork to our team and we will supply printing proofs to ensure you're entirely satisfied with your canvas before printing.

Alternatively, you can choose from one of our galleries of fine art and photography, which have been carefully curated by our design team. Each high resolution image offers immaculate detail and pairs perfectly with all of our mechanisms.

# CURATED GALLERIES

Our carefully curated gallery of photographs and artwork offers a wide variety of images that we can reproduce onto canvas for your project.

(Larger previews of our gallery can be emailed upon request)

Images will be cropped to fit chosen canvas.
