

If you want your
blinds to move,

JUST ASK!

Qmotion[®]uk
advanced shading systems

If you thought that using automated blinds couldn't get any easier, well think again!

Using either Amazon Echo Plus or Amazon Echo Show (Gen2), QMotion blinds can be activated by voice, app or remote control, straight from the box. No need for specialist programming, installation of any bridges/interfaces or other unnecessary hassle.

It's quick, simple and convenient - just what you'd expect from the industry's premium brand in automated blinds.

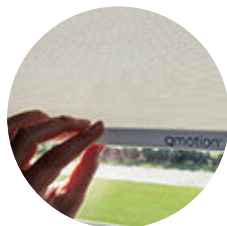

- **Fast and convenient voice activation - talk directly to your blinds with Amazon Echo Plus or Amazon Echo Show (Gen2)**
- Quick and easy set up - no electrician, wiring or bridge required
- **Child friendly - no chains or cords required to raise and lower the blind**
- Timer and scene setting function - raise and lower blinds automatically, whether you're in the home or away

- **Quiet-running – patented, counterbalance spring technology minimises noise and battery consumption (up to three years before replacement)**

- Choice – over 500 fabrics to choose from with blind sizes up to 3000mm wide and a maximum 3500mm drop*¹. Change fabric easily whenever you want*².

- **Manual operation - unique manual override allows blinds to be hand pulled at any time without damaging the mechanism**

- Attractive – minimal edge gaps between fabric and brackets
- **Remote operation - using QMotion's wireless ZigBee protocol activate your blinds via the Alexa app when away from home**
- Made in the UK

*1 = Please see fabric labels to ensure your window size matches the fabric size available

*2 = Weight of fabric and size of blind will reduce the battery life as can environmental conditions

We offer a choice of over **500 fabrics** with blind sizes up to **3000mm wide** and a maximum **3500mm drop***1.
