

ENHANCE APP CONTROL WITH INSTANT-ACCESS BUTTONS

I PORT Surface Mount with Buttons takes the best of our Surface Mount and combines an IP Keypad for instant access buttons that can be added to virtually any control system.

Surface Mount with Buttons bezels communicate via LAN and talk directly to any control system processor. With drivers for popular systems like Savant, Crestron and Control4, Buttons can compliment any system for quick access to scenes, macros, and discrete commands.

Take App-based control to the next level with Surface Mount with Buttons.
