Cyber Protection Insurance Multiple limits and Breach Response Service Boost

Delta's cyber protection policy provides individual limits for dedicated response services in addition to the policy aggregate limit of liability. In doing this, Delta's cyber protection provides Insureds with three specific towers of coverage and by providing dedicated limits for breach response services, the policy better ensures response costs do not erode aggregate cover for first party & third-party limits.

It is these extra towers of coverage paired with a breach response service providing 24/7 rapid response from the top IT security experts locally and internationally that make the Delta cyber protection policy stand out from the crowd.

HOW DOES IT WORK?

Breach Response Boost

In the event either Towers 1 or 2 are exhausted, the policy will continue to cover additional breach response costs up to the policy aggregate limit.

The description of coverage contained in this document is a summary and is for illustrative purposes only. The coverage is subject to terms and conditions outlined and certain restrictions, limitations and exclusions contained in the policy of insurance. In the event of any conflict betweenthe descriptions of coverage in this document and the policy of insurance, the provisions contained in the policy of insurance will prevail.
