

The First Personal Cyber Insurance with an IT Risk Management solution in Singapore

There are no good stories from those who have experienced being hacked. Mobiles, laptops and other personal devices are incredibly vulnerable to cyberattacks.

With Delta's Personal Cyber insurance, we help you to bounce back after a cyberattack, and help you to prevent it happening in the first place.

Our DynaRisk dark web monitoring tool gives you a step-by-step guide to improving the cyber security of you and your family.

Businesses will significantly improve their corporate risk by investing in Percy for their employees, as staff become more engaged, cyber savvy, aware of the risks, and learn how to spot phishing and other common scams.

Protects your devices,
identity & finances

1. DYNARISK MANAGEMENT

What can I do to prevent a cyber attack in the first place?

We provide DynaRisk's Ultimate level of cyber protection, giving you the tools to assess your current risk with a personal cyber security score. You will be able to monitor credit cards and your family's personal devices and emails, and receive personalised to-do actions to improve your household's cyber security while DynaRisk continues scanning for vulnerabilities and identifying any data breaches.

DYNARISK CYBER PROTECTION

The DynaRisk Ultimate plan provides vulnerability and breach scanning for 5 household devices, 5 emails, and monitoring of credit cards and phone numbers.

Cyber Security Score

Similar to a credit score, DynaRisk's Cyber Security Score indicates how safe you are online by assessing over 70 personal risk factors. It's simple - the higher your score, the safer you are.

Data breach monitoring

DynaRisk's intelligence team recovered over 882 million breached and leaked data records in the 2nd quarter of 2020 alone. They constantly monitor the Dark Web and will notify you immediately if they discover your personal data has been compromised and advise you of next steps.

2. UNAUTHORISED ONLINE TRANSACTIONS

What if I have detected unauthorised transactions and my bank won't reimburse me?

We cover unauthorised online transactions from your primary personal bank account.

3. MOBILE BANKING PROTECTION

What if I have lost my mobile and my mobile payment app has been compromised?

We cover for your financial loss from unauthorised use of your mobile payment following the loss or theft of your mobile device.

Personalised Improvement Plan

A personalised dashboard with your Cyber Security Score, a list of tailored actions designed to help improve your online safety.

Email alerts on discovered cyber security threats

Receive emails about the latest cyber threats and alerts when a new breach or threat has been discovered.
