SALESHEET

GIOPATO & COOMBS

**One day in Venice, wandering through its alleyways. Arrived on the small island of Murano by boat, from the Fondamenta dei Vetrari we were two explorers in search of the right "soffio" (breath), to give life to the project we have in mind.**

Venice and its colors, between the lagoon and the sky. The warm people and the heritage they guard, in their gestures. All this was the inspiration for the Flauti collection, between human connections and glass art.

The light passes through the glass components meeting the color, and the result is like a soft beam of light. The source is a custom-designed Softspot, a brass cylinder equipped with the most innovative LED technology.

Born from glass, air, and fire. An artisan gesture that shapes the mass of glass, with the colors and reflections of the island of Murano. Each creation combines small domes, rosettes, chestnuts, or trumpets: all modules with different textures obtained with various glasswork techniques, and with unique shades. Sands, pigments, fragments of light from the secrets kept in the heart of Venice.
