Hand Rail Construction

A Hand Rail is made of layers, also known as plys.

Finger joints on all plys

Finger Joint Hand Rail

- All plys utilize finger joint construction.
- Top plys are color matched in 42" lengths and longer.
- Bottom plys contain multiple finger joints.
- Rail is made with two or more plys.

Top ply is free of finger joints*

Solid Cap Hand Rail

- The top ply will be free of finger joints.
*14-16' lengths of rail may contain up to one (1) visible butt joint on the cap.
- Bottom two plys utilize finger joint construction.

Engineered hand rail consists of core filler pieces that are wrapped in the profile of the hand rail. As such, engineered hand rail has SIDES instead of PLYS.
