DALLAS DISTRIBUTION CENTER

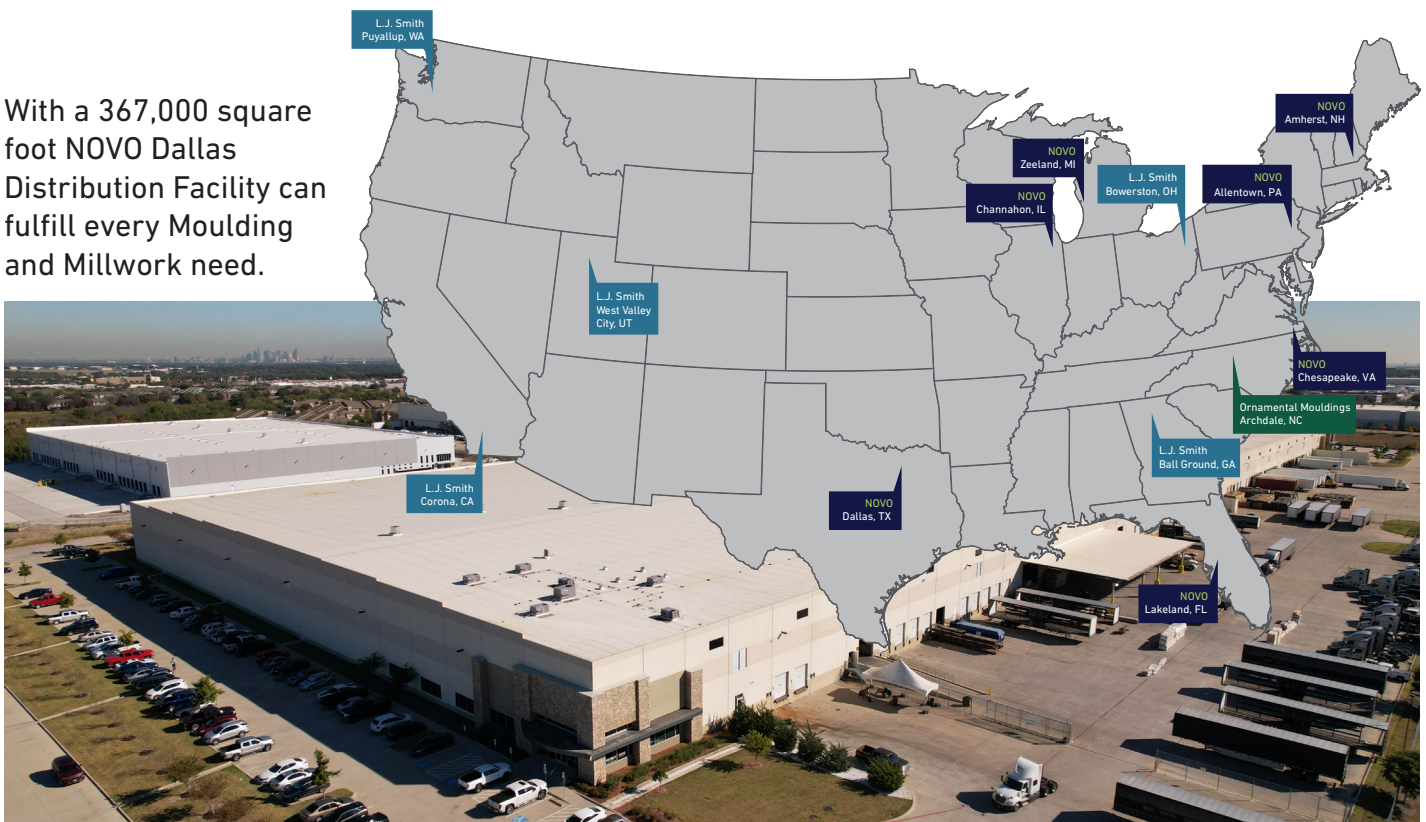

our STORY

DEEP ROOTS. HIGH STANDARDS. BRIGHT FUTURE.

Founded in Dallas, Texas in 1952, Novo building Products (previously known as Southwest Moulding CO.) has grown into one of the largest millwork distribution and manufacturing companies in the United

States.. With a geographic footprint that touches the majority of the eastern half of the United States, Novo Building Products is positioned for continued expansion.

With a 367,000 square foot NOVO Dallas Distribution Facility can fulfill every Moulding and Millwork need.

our

FAMILY

**NOVO BUILDING PRODUCTS IS PROUD TO BE
PART OF THE ADENTRA FAMILY.**

Novo Building Products is an industry leading manufacturer and distributor of mouldings, stair parts, doors, and specialty building products. We serve building material dealers (lumberyards), door shops, retail home centers, and millwork manufacturing partners throughout the United States and parts of Canada and Mexico.

Learn more at **NOVOBP.COM**.

ADENTRA is one of North America's largest distributors of architectural-grade building and millwork products to the residential and commercial construction industries. Adentra currently operates a network of 86 distribution and fabrication facilities in North America consisting of five industry leading distribution brands: Hardwoods Specialty Products, Mid-Am Supply, Frank Paxton Lumber Company, Rugby Architectural Building Products, and Novo Building Products.

Victorian

Glamorous, Ornate, Art Deco, Baroque, Southern Plantation, Colonial Estate...

Victorian Mouldings hearken to the richness of old world artisan builders, craftsmen and clothiers that regarded every part of their work a piece of art. It is a style that can transform the bland into a bold statement of line and form. Ornate mouldings can be combined to restore a great Painted Lady or add a subtle flair and richness to add glamour to any room in your home.

Contemporary

Eclectic, Artistic, Avant-Garde. Full of life, culture, color, texture, unique and found objects, natural and man made materials...

At its core, the word "contemporary" means "of the moment". Sleek & thoughtful, contemporary design spaces often feature a mixture of both straight and elegantly curved lines, which can be seen as a slight nod to this style's art deco roots. Today, the look is defined by curved lines, and embraces minimalistic elements highlighting grays, beiges and shades of white. Although the contemporary trend changes with time, the basic cutting edge simplicity and idealism remains as unique as your vision.

Craftsman

Line & Structure, Handcrafted, Architectural, Artisan Craftsman, Modern-Farmhouse, Western Ranch...

Craftsman homes are full of endless detail and character, known for their natural materials, cozy interiors, and wide porches. Patterns and lines show the Arts & Crafts Architectural style through the use of natural woods combined with simple paint schemes. Wainscoting or beadboard detailing, and decorated ceilings with beams will help to give your home that warm feeling.

LET YOUR IMAGINATION BE YOUR ONLY LIMITATION

Build-ups—combining two or more mouldings together to create a unique look customized to suit your own décor needs and desires.

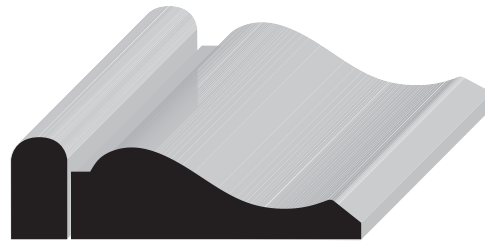

Ceiling build-ups usually consist of at least one crown or bed mould and are typically combined with a variety of other mouldings including casings, bases and panel moulds.

LET YOUR IMAGINATION BE YOUR ONLY LIMITATION

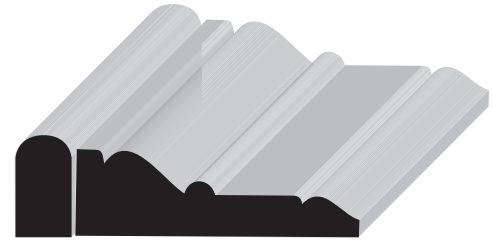

Build-ups—combining two or more mouldings together to create a unique look customized to suit your own décor needs and desires.

Casing build-ups usually consist of a variety of casing styles, including S4S typically combined with a nosing (BB1), panel mould or quarter round.

Build-Ups | Combine & Design

General Requirements

GRADE: Wood mouldings are available in two grades. "N Grade" is intended for natural or clear finishes and the exposed face must be of one single piece. "P Grade" is intended for opaque paint finishes or overlays and can be finger jointed and or "edge glued".

These grades may have a few minor characteristics such as light checks, small pitch pockets, light torn grain, occasional medium stain or a small amount of medium pitch. A serious combination of these is not admissible in any one piece. The number and extent of characteristics permitted varies as the area of the piece increases or diminishes.

N-GRADE (suitable for natural, stain, paint or enamel finish). On the basis of net 2" face - 12' long this grade will admit the following characteristics or their equivalent.

- A.** A small spot of torn grain, one foot of medium pitch, light skip in dressing on back, or
- B.** One small and one very small pitch pocket, or
- C.** One short tight season check and a light snipe at one end, or
- D.** Medium stain in occasional (10%) pieces for one third the area in on otherwise perfect piece.

Characteristics that will not show when piece is laid shall not be given the same consideration as characteristics elsewhere.

P-GRADE (paint or overlay grade) The same quality as N-Grade except stain is no defect. Glue joints (laminated or finger joints) must be precision machined and assembled with tight joints. Patching, filling or plugging is permitted providing a paintable surface results.

It is recommended that when installing Finger Joint mouldings that the mouldings be acclimated for 72 hours at the installation site before installing them.

GENERAL REQUIREMENTS - MDF/FINGER JOINT MOULDING

GRADE: MDF mouldinga are intended for opaque paint finishes or overlays. MDF moulding and millwork will be manufactured from panel boards of varying densities. Thickness and width tolerance + or - 1/32 per WMPMA grade rules. Trimbacks - not more than 10% permitted in any one item.

WMPMA recommends that all MDF mouldings be purchased paint primed. Raw MDF has a tendency to absorb water vapor from the surrounding air and this could cause fiber pop. This will be the customer's liability if they choose raw material.

It is recommended that when installing MDF mouldings that the mouldings be acclimated for 72 hours at the installation site before installing them.

Finger-Jointed Moulding from our quality suppliers is precision milled using advanced technology in a wide selection of profiles. The advanced manufacturing methods and the woods superior moulding characteristics result in long lengths and very few defects.

- All products should be inspected for manufacturing defects prior to painting or installing.
- Please store horizontally and off the floor, and let acclimate 72 hours prior to installation.
- Install with 15-18ga pin nails with proper air pressure to counter sink fastener 1/16".
- Use light weight spackle and paintable latex caulk when filling and sand with 80-120 grit paper.
- Finish with a good quality latex paint applied following the manufacturer's specifications.

MDF from our quality suppliers is light-weight and manufactured using eco-friendly standards. The superior workability of our MDF mouldings offers an ease of cutting , mitering and finishing, making it excellent for any size job. The combination of light-weight substrate, consistent easy to paint surface and long lengths result in superior workmanship and a streamlined final finishing process.

- All products should be inspected for manufacturing defects prior to painting or installing.
- Please store horizontally and off the floor and let acclimate 72 hours prior to installation.
- Install with 15-18ga pin nails with air pressure set 90-110psi to counter sink fastener 1/16".
- Use light weight spackle and paintable latex caulk when filling and sand with 80 grit paper.
- Finish with a good quality latex paint applied following the manufacturer's specifications.

Moulding Finishing Guidelines

Disclaimer: All products should be inspected for manufacturing defects prior to installation or painting/staining.

Note: Not following guidelines will not be covered under NOVO Building Products return policy.

1. It is recommended to let the mouldings acclimate for 72 hours at the installation site before installing them.
2. Before applying first finishing coat, inspect all mouldings and remove all marks & scuffs from handling, and other blemishes by sanding all surfaces. Recommended Grit: #320 grit sandpaper for unfinished mouldings and #400 grit sandpaper for primed mouldings. Always sand in the direction of the grain.
3. After sanding is complete, clean the mouldings with a clean tack cloth to remove dust and foreign debris. Avoid use of caustic or abrasive materials to clean mouldings. Do not use steel wool on bare wood. Do not finish during or after high-moisture periods.

UNFINISHED MOULDINGS – STAINING OR CLEAR FINISHING:

After sand and fill for smooth surfaces is finished, your moulding is ready for a protective sealer application (if staining or clear-coating); or primer application (if painting). To ensure uniform moisture exposure and dimensional control, all surfaces of moulding must be sanded, treated and finished equally.

Note: Various species of woods react differently to staining. It is recommended to test the stain to ensure a satisfactory finish result. Follow stain manufacturer's recommendations.

A wood conditioner / sanding sealer should be applied prior to staining to promote a uniform appearance and avoid sharp color contrasts or a blotchy appearance. A sealer allows for even stain application, it also reduces grain contrast and the depth of stain penetration. As with all finishes, test prior to full application. Follow wood conditioner/sanding sealer manufacturer's recommendations.

Once sanding sealer has fully dried per manufacturer's recommendations, finish the moulding with good quality oil-based or very low water-based polyurethane stain. **Note:** If a pre-stain sealer was not used, water-based finishes increase the potential of splits, highlighted joints, grain raise and volume. **Natural grain and color variations are normal and not considered manufacturing defects.**

UNFINISHED OR PRIMED MOULDINGS – PAINTING:

- **To Paint Unfinished Mouldings:** Seal the moulding with an oil-based or very low water-based quality primer and allow to fully dry. Once dry, sand the surface using #400 grit sandpaper. Next, apply two top coats using a high-quality finish. Allow first coat to fully dry before applying second coat. Avoid excessive application; multiple thin coats followed by sanding in between coats provide best results. Always follow paint manufacturer's recommendations for product you choose.
- **To Paint Primed Mouldings:** Sand mouldings with #400 grit sandpaper. Sand all surfaces. Next, apply two top coats using a high-quality finish. Allow first coat to fully dry before applying second coat. Avoid excessive application; multiple thin coats provide best results. Always follow paint manufacturer's recommendations for product you choose.
