

REGIS  UNIVERSITY

FIELD GUIDE

DISCOVER MORE THAN AN EDUCATION

At Regis, you'll learn macroeconomics, 18th-century literature, organic chemistry and political philosophy. You'll also learn who you are and who you want to be. **That's because at Regis, we know that learning doesn't just happen in the classroom.** Every hiking, skiing and rafting trip in the nearby Rocky Mountains will teach you about your strengths. Every Broncos game, Red Rocks concert and Denver Art Museum visit will show you the best of the Mile-High City. Every campus café sushi night, late-night study session and snowball fight outside of Main Hall will make you a part of our close-knit community. All of this and so much more becomes part of your Regis education, as you discover who you really are.

CAMPUS LIFE

17
average class size

63,312
average service hours in
an academic year

85
student
clubs and
organizations

100+

Pre-Dental	

SCIENCE, DUAL-DEGREE ENGINEERING AND MATH

Biochemistry	Environmental Science
Biology ³	Environmental Studies
Chemistry	Mathematics
Computational Physics	Neuroscience ³
Dual-Degree Engineering	Physics
	Psychology ³

Business and Computing

Couple your business education with social justice principals and the skills you'll need to compete in an increasingly technical world. Our customizable programs and certificates allow you to study what interests you, helping you to emerge as a leader in marketing, accounting, business administration or computer science.

Education

We view educators as leaders. Through reflection on values and social responsibility, you'll discover how educators can affect positive change in society.

Fine Arts, Humanities and Social Sciences

Talking about change is easy. Making an actual difference is another matter. Whether you decide to write grants, mediate high level settlements, or become a community leader, this is where you'll turn ideals into action.

Health Care

Concern for the health and wellness of others is more than a degree or profession. It's a passion and a calling, an opportunity to stand at the interesection of science and caring.

Science, Dual-Degree Engineering and Math

Learn to apply the applied sciences to what really matters to you. Our students have used their knowledge to protect wildlife, understand depression, and map the cosmos.

CAREER OUTCOMES

\$58,000

average starting salary for a Regis University graduate

95%

graduates employed or in graduate school within 6 months

2019 graduates are working in **37 states** and **abroad**
