

NEW YORK STATE GIS ASSOCIATION

Recognition of

Individual Achievement in GIS

FINALIST

is hereby granted to

Sung-Gheel Jang

Sung-Gheel Jang began his career in Cleveland, serving as program coordinator of a graduate certificate program in urban GIS. He is now involved in many Long Island-wide mapping projects, such as the coastal flood risk maps developed as part of the School of Marine and Atmospheric Sciences at Stony Brook project which is looking into climate change. Another mapping project is the Cultural Social Map of Latino Long Island. As the Director of the Geospatial Center, and the faculty director of the Advanced Graduate Certificate of Geospatial Science and Minor in Geospatial at Stony Brook University, he has been instrumental in the formation and management of both the GSC and the GSS certificate. Over his many years of service, he has touched the lives of thousands of students hoping to pursue a career in GIS and/or geospatial analysis and research.

It is with great pleasure that we recognize Sung-Gheel Jang for all of his hard work in promoting GIS here in New York State.

Awarded: October 2017

Colin Reilly, President
