

NEW YORK STATE GIS ASSOCIATION

# 2017 UAV Innovation Award EAGLEHAWK, LLC

Will Schulmeister, founder of EagleHawk, utilizes captured geo-referenced aerial imagery from unmanned aircraft systems for site delineation, infrastructure/feature collection, and identification within GIS. Processing the data and capitalizing on the GIS geospatial component applied from UAV's assists in identifying issues, querying data, and providing solutions to clients. Using GIS has proven monumental in short/long term problem solving, streamlining production, assisting with planning/allocating budgets, being an integral component in management programs, and reducing overall costs.

It is with great pleasure that we recognize EagleHawk, LLC for their innovation in the UAV discipline.

Awarded: October 2017
