A graduate of SUNY Buffalo in GeoData Science, Will spearheads all things GIS at EagleHawk. EagleHawk specializes in aerial data collection using unmanned aircraft systems for site mapping and infrastructure inspections. Using geospatial data obtained from drone imagery, EagleHawk leverages the power of location to identify problems and locate assets from above. Using this GIS based approach to problem solving, EagleHawk helps clients manage their assets in a more data driven manner, saving them money and providing baseline data for future maintenance and management programs. In just 8 months the company has inspected hundreds of roofs and mapped thousands of acres of terrain, all with drones collecting geo-located data.</b></p>
