

NEW YORK STATE GIS ASSOCIATION

Recognition of

Individual Achievement in GIS

is hereby granted to

Todd LaQuay

Todd LaQuay has taken the lead in developing several web applications for the Seneca Nation, building datasets through research, surveying of end user needs, and collection of data. He ultimately gained an understanding of all facets of government from transportation to infrastructure to the environment, along with emergency management. Todd obtained his FAA license which now allows the Seneca Nation to monitor their construction sites and track erosion & invasive species along their waterways. A strong focus in asset management collection has been an on-going project for 3 years.

Additionally, several applications in Survey 123 webhooks have been initiated. Along with a touch screen story map application in the new Seneca Nation Cultural Center, Todd has been utilizing operations dashboard to give management a quick look at what their employees are accomplishing.

Having worked for the Seneca Nation for 16 years Todd has been an integral part of the SNI GIS development.

It is with great pleasure that we recognize Todd LaQuay for his dedication, hard work, and contributions to the growth of GIS in NYS

Awarded: September 2019

Richard A. Reichert, President
