

NEW YORK STATE GIS ASSOCIATION

Recognition of

Individual Achievement in GIS

is hereby granted to

Catherine DuBreck

Catherine has been helping high school students learn what GIS is and how they can use it to solve spatial problems with her work at GIST Upward Bound Summer Camp 2021 at Monroe Community College in Rochester NY. She has been promoting this program while privately tutoring students on the side. She took extra programming classes to be able to aptly teach students in all the intricacies of using GIS software. She has a passion for maps, learning, and helping in her community. Her professional work in GIS has been mostly community based while she spends her free time working to help the youth community understand how cool GIS can be. Shes amazing!

It is because of this forward thinking that we recognize Catherine DuBreck for her contribution to the GIS profession.

Awarded: September 2021

Chris Badurek, President
