

# Interim report

2nd quarter 2020 Unaudited

### Interim report from the Board of Directors

OBOS Boligkreditt AS ("The company") is registered in Oslo, and it is a wholly owned subsidiary of OBOS-banken. OBOS Boligkreditt started operations in 2016 and is licensed to operate as a mortgage company and to issue covered bonds. The company is OBOS-banken's most important source of long term market funding and an important part of the bank's funding strategy. Its assets consist of retail mortgage loans and housing co-operative loans originally underwritten by OBOS-banken. Total lending at second quarter end 2020 amounted to NOK 22 896 million. All loans are at the time of acquisition from the bank within 75 % of the property's estimated value. Total issued covered bond loans at June 30, 2020 amounted to NOK 20 190 million. Overcollateralization was at 113 %.

#### **Rating**

All covered bonds issued by OBOS Boligkreditt AS have been assigned a Aaa-rating by Moody's.

#### Second quarter results

The income statement and balance sheet are compared with last year's figures (in parentheses).

The company's net interest income amounted to NOK 11.9 (23.4) million for the second quarter of 2020. Net interest income is reduced due to a more rapid reduction in interest rates to customers than was reflected in the reduction of the 3m NIBOR and hence financing costs. Total operating expenses amounted to NOK 1.6 (1.6) million. These expenses are mainly related to payments for banking services provided by the parent bank. Profit before loan losses and taxes was NOK 12.2 (21.7) million in the second quarter of 2020. The calculation of expected loss (ECL) for OBOS Boligkreditt AS resulted in reversal of net loan losses of NOK 1.0 (1.0) million in the second quarter of 2020. The ECL calculation as at 30 June 2020 shows expected credit loss of NOK 7.4 million. Profit after tax was NOK 10.3 million (17.7) in the second quarter of 2020.

No covered bonds matured during the quarter, but OBOS Boligkreditt bought back NOK 622 million of ISIN NO 0010806870 and issued a new covered bond NOK 1 000 million of ISIN NO 0010786494. OBOS Boligkreditt AS had seven bond loans outstanding at 30 June 2020 with total debt securities issued of NOK 20 190 million face value, compared to seven bond loans and NOK 15 647 million face value outstanding at 30 June 2019.

Total assets at second quarter end 2020 amounted to NOK 23 016 (18 798) million. Gross lending to customers amounted to NOK 22 896 (18 753) million. There are no substitute assets forming part of the cover pool. Overcollateralisation, calculated as the value of the cover pool relative to the value of outstanding covered bond loan debt was 113 percent as at 30 June 2020, compared to 119 percent at 30 June 2019. At second quarter end 2020, the mortgages in the cover pool had a weighted average loan-to-value ratio of 34 percent.

OBOS Boligkreditt AS' liquidity portfolio consisting of Liquidity Coverage Ratio (LCR) eligible assets amounted to NOK 30.5 (30.8) million at 30 June 2020, reporting a total LCR of 1155 (572) percent.

#### Capital strength

Total own funds for the purposes of capital adequacy amounted to NOK 1 661 (1 158) million at June 30, 2020. Risk weighted assets amounted to NOK 8 547 (6 768) million, the CET 1 capital ratio was 19.4 (17.1) percent. OBOS Boligkreditt AS uses the standardised approach to calculate capital requirements for credit risk.

#### Macroeconomic development and outlook for the company

The outlook for 2020 has changed dramatically due to the Covid-19 crisis, which has caused a severe setback for the Norwegian economy. A number of effective measures have been introduced to reduce the financial consequences of the virus outbreak including:

• Extraordinary F-loans to the banks offered from Norges Bank. F-loans are fully allocated at an interest rate corresponding to the key policy rate.

- Countercyclical capital buffer has been reduced from 2.5 percent to 1.0 percent as from 13 March 2020.
- The key policy rate was reduced three times during spring and is now 0.00 %.
- Authorities have also reinstituted the Government Bond Fund with a mandate of purchasing corporate bonds which will increase liquidity and access to capital in the bond market for larger companies.
- A compensation scheme where the State assumes part of the costs inflicted on Norwegian companies by Covid-19.
- Most banks have granted grace periods for instalments by request, which is likely to be a powerful
  measure along with interest rates closer to zero with regards to default risk. Most banks also
  reduced interest rates rapidly during the spring.

Prior to the Covid-19 outbreak, macro figures in Norway were trending in a positive direction. Low unemployment, inflation around normal levels and a weak Norwegian krone helped exporting companies. Following the Covid-19 outbreak, oil prices dropped dramatically, leading to cutbacks in investments in the important crude oil industry and related industries. This resulted in a sharp rise in unemployment in all sectors in Norway. New housing sales was showing signs of weakness during the spring, while house prices have not seemed to react noticeably.

Currently, many indicators have been through a speedy recovery in the financial markets, and there is generally a sense of normalisation in the Norwegian economy. Government restrictions on activity have been gradually lifted, leading to a quick recovery of unemployment figures. There is currently a hope that the crisis will be somewhat milder than what was anticipated at the end for the previous quarter, even if some setbacks with regards to the spread of infection are currently being reported.

OBOS Boligkreditt's portfolio has an average loan to value (LTV) ratio at a low 34 percent, and no loans are in default. With an allowable LTV of 75 percent, there is significant headroom for even severe drops in house prices, should that pessimistic scenario materialize. Furthermore, the parent bank holds significant volumes of loans which qualify for transfer to OBOS Boligkreditt. Should house prices decline and LTV ratios rise, replacement loans will be transferred.

The prospects for OBOS Boligkreditt remain stable. The adverse macroeconomic environment observed going out of the previous quarter has now improved. The board is satisfied with the low LTV, along with the significant amount of loans that can be transferred from the parent bank should the situation call for it.

Oslo 13.08.2020

The board of directors of OBOS Boligkreditt AS

### **Notes**

#### Note 1 - Introduction

OBOS Boligkreditt AS is a fully owned subsidiary of OBOS-banken AS. The company was formally founded 13 May 2016, with the sole purpose of acquiring mortgages from OBOS-banken AS. The company will finance the business through the issuance of covered bonds. OBOS Boligkreditt received the required permit for operation from the Norwegian Financial Supervision 15 August 2016. OBOS Boligkreditt is registered and domiciled in Norway. The bank has business- and visiting address at Hammersborg Torg 1, 0129 Oslo.

#### Note 2 – Accounting principles

The interim report for OBOS Boligkreditt has been prepared in accordance with IAS 34. The interim comprises the period 01.01.2020-30.06.2020 and has been prepared in accordance with simplified IFRS.

All amounts in the accounts and notes are stated in Norwegian kroner (NOK) unless otherwise specified. The company's functional currency is NOK.

#### **IFRS 16 Leases**

According to IFRS 16 all leases should be reported on the balance sheet as assets and liabilities. Previous classification of leases as either operational or financial leases have been removed. All leases will be treated as financial leasing. Short-term leases (less than 12 months) and leasing of assets of low value are exempted from the requirements. IFRS 16 was implemented from 1 January 2019. The implementation does not have any effect on the accounts.

#### **IFRS 9 Financial Instruments**

OBOS Boligkreditt AS applies IFRS 9 for measurement of financial instruments. Financial assets and/or financial liabilities are reported on the balance sheet according to IFRS 9.

#### **Derivatives**

Derivatives are recorded at fair value at the time the derivative contracts are entered into, and are recognized at fair value through profit or loss subsequently. Derivatives are presented as a financial asset if the value is positive and as a financial liability if the value is negative. According to IFRS 9, an entity shall apply the hedge accounting requirements to a financial asset or a financial liability that is designated as a hedged item. OBOS Boligkreditt AS doesn't apply the hedge accounting requirements under IFRS 9, but applies interest rate swap agreements to reduce interest rate risk between fixed-rate and market rate. Swap interest rate and change in value are recognized through profit or loss under "Net gain/(loss) and change in value of financial instruments".

#### Net gain/loss on financial instruments

For interest bearing financial instruments that are measured at fair value, interest income is classified as "Interest income, fair value", and interest expense is classified as "Interest expense, fair value" with the exception of interest on derivatives. Interests paid and received in interest rate swap, as well as changes in accrued interest, are recognized as "Net gain/(loss) and change in value of financial instruments". Other changes in value of financial instruments are also recognized in this note.

The annual report for OBOS Boligkreditt 2019 gives a more detailed description of accounting principles used. The interim report is not audited.

#### Note 3 – Accounting estimates and discretionary Assessments

OBOS Boligkreditt prepares accounting estimates and makes discretionary assessments based on historical experience, assumptions about the future and other factors. The accounting estimates are evaluated continuously and may deviate from the results achieved. However, they are based on the best estimate available at the time of the financial reporting. Below are the most important areas where accounting estimates and discretionary assessments are used and these may be subject to changes in capitalized values in future periods.

#### 3.1 Value measurement at fair value

OBOS Boligkreditt estimates the fair value of their financial instruments, which are not listed in an active market, using valuation methods described in note 17 in annual report 2019 and the accounting principles. The credit institution's choice of method and associated assumptions are based on market conditions at the balance sheet date. Financial instruments comprise the credit institutions holdings of bond funds.

#### 3.2 Write-down of financial assets

The method for measurement on write-downs for expected loss on financial assets in IFRS 9 depends on credit risk increase since initial recognition, instead of an incurred loss model as in IAS 39. The assets are divided into three stages, based on the credit impairment degree. At initial recognition, and if credit risk has not increased significantly, provision will be made for 12 months expected loss (stage 1). If the credit risk had increased significantly after initial recognition, but there is no objective evidence for loss, provision will be made for total lifetime (stage 2). If credit risk has increased significantly and there is objective evidence for loss, provision will be made for total lifetime (stage 3). In addition, the interest income for the financial assets under stage 3 will be calculated on net balance value of the loan, after deduction of write-down on expected loss over total lifetime. This is different from stage 1 and 2 where the interest income is calculated on gross balance value.

For a more detailed description of the method used for measurement on write-down, see the annual report 2019 note 2 and 8.

| Net gain/(loss) and change in value of financial instruments                 | 1 946   | -66     | 2 414         | -94        | 238    |

<sup>1)</sup> Net interest income (/expenses) from derivatives that have been entered into as hedging agreements against the ordinary portfolios of OBOS Boligkreditt's fixed rate covered bonds is classified as net gain/(loss) and change in value of financial instruments in accounting terms. Net interest income on derivatives is included in relevant key figures.

<sup>2)</sup> OBOS Boligkreditt has used the Fair Value Option (FVO) when valuing fixed rate covered bonds in accordance with IFRS 9. The principle implies that changes in value as a result of changes in own credit risk are recognized in the OBOS-banken group's comprehensive income. The amount that has been deducted from OBOS Boligkreditt's result and transferred to the Group is 2,7 million Norwegian kroner on 30 June 2020.

"OBOS Boligkreditt AS has ongoing transactions with related parties. All transactions are carried out as part of the ordinary business and at market terms. OBOS Boligkreditt buys management services from OBOS-banken AS and is charged through the parent company to a share of the OBOS Group's joint costs, which are settled at full cost after actual use. OBOS Boligkreditt has established a NOK 3.0 billion credit facility with the parent company OBOS-banken AS for the coverage of current assets, including the transfer of the loan portfolio. The company is charged with the NIBOR + 50 bp. Collateral and a credit commission fee of 0.15% of the credit limit of NOK 3.0 billion. The company uses employees in OBOS-banken AS and the OBOS Group, as well as payroll systems, invoice processing systems and banking / finance systems, and in this connection has an intermediary with OBOS-banken AS to cover current operating payments. As at 30.06.20, this debt was at NOK 2.6 million, which is included in the drawn credit facility. All short-term deposits are settled on a continuous basis.

The credit institution entered into an agreement with OBOS-banken AS on a rolling liquidity facility, which at any time covers the expected liquidity that matures the coming 12 months. This liquidity facility is unused at 30.06.20."

#### Note 7 - Assets and liabilities measured at amortized cost

(Figures in NOK 1000)

For all items booked at amortised cost, the book value is approximately equal to the fair value. This applies to the following balance sheet items: Loans to and receivables from credit institutions, Loans to and receivables from customers and Debt to credit institutions.

#### Note 9 - Assets and liabilities measured at fair value

(Figures in NOK 1000)

OBOS Boligkreditt uses the following valuation hierarchy for financial instruments measured at fair value:

Level 1: Market price (non-adjusted) quoted in an active market for identical assets or liabilities.

Level 2: Market price that is not listed, but is observable for assets or liabilities either directly (for

example in the form of prices) or indirectly (for example derived from prices)

Level 3: Information that is not based on observable market data.

There was no movement between level 1 and 2 during the periods.

#### Method for calculating fair value of financial instruments measured at fair value:

#### Certificates, bonds and debt securities

The bank obtains market prices and credit spreads from independent brokers in major financial institutions in order to calculate fair value.

#### Bond funds

The bank obtains the market value of fund units from the individual fund manager.

#### Financial derivatives

The fair value of financial derivatives is calculated based on discounted cash flows based on exchange rates and current interest rate curves at the balance sheet date.

See also the description provided in note 2: accounting policies.

| As at 30.06.2020  | Level 1 | Level 2                      | Level 3 | Total                        |

#### Estimated Stage 1 losses on assets measured at fair value

The table below show changes in fair value and expected losses on loans to customers measured at fair value through profit or loss, which are reversed over other comprehensive income.

|                               | Stage 1 | Stage 2 | Stage 3 | Total |
|-------------------------------|---------|---------|---------|-------|
| Opening balance               | 3 673   | -       | -       | 3 673 |
| Net change in expected losses | 890     |         | -       | 890   |
| Closing balance               | 4 563   | -       | -       | 4 563 |

Net change in losses on stage 1 on loans measured at fair value, is reversed over other comprehensive income for OBOS Boligkreditt AS.

#### Breakdown of loan provisions per. segment and stage

The tables below show the provisions broken down by the various segments and the stages, as well as change in loan provisions during the period.

#### Changes in gross carrying amount - Housing co-operatives segment

The table below shows changes in gross carrying amount to explain the significance of changes in loan provisions.

Classification at first-time Significant increase Significant

|  | capitalisation and fresh<br>loans | in credit risk since<br>the time of the first<br>capitalisation | increase in credit<br>risk since the time<br>of the first<br>capitalisation and<br>objective evidence<br>of loss |            |
