

Shmuel 1 Perek 5

- After the Plishtim captured the Ark it was placed next to their idol, Dagon.
- Each morning Dagon was found dismantled until the final morning when Dagon was found with a severed head and limbs.
- The Ark was moved from city to city. Every place the Ark was transferred it struck the people with hemorrhoids and mice would eat their intestines.
- Death spread through out whichever nation the Ark was located in.
- It was decided to return the Ark to its rightful owners, Yisrael.
