**About the Lessons** – students learn physics, mathematics, mechanical & software engineering by watching engaging demonstrations and by building models out of LEGO bricks of real-world machines. Problem solving, critical thinking and collaboration are key elements of the program.

**About How We Teach** - our classes operate in a multi-age environment. In all cases, we optimise our delivery according to ability and understanding. Lessons and activities are different for each term.

**Peace of Mind** - all educators are working with children compliant according to state laws. All after-school clubs operate in agreement with the host school.

Young Engineers club is an Australia-wide initiative to help kids Learn  
and L♥VE STEM
