

ART STUDIO

Art Studio at Macademia Daytime Academy introduces younger learners to developing their creativity, confidence, and personal artistic style. Students explore a range of techniques, materials, and ideas while learning how to express themselves visually in a relaxed and supportive studio environment.

The course is structured into flexible learning blocks, designed to suit home-educated children. Sessions are 2 hours long and follow a semi-structured, project-based approach, allowing students to explore ideas at their own pace while being guided by tutors.

Through practical projects, students experiment with drawing, painting, and mixed media, developing their ideas into finished pieces while building confidence, creativity, and visual communication skills.
