

Cleaning and Maintenance

PERLATO

Perlato Fireclay Surfaces

Fireclay is relatively low-maintenance. Follow these guidelines to clean your fireclay sink and maintain its finish and beauty:

- Wash the sink daily and as needed.
- Wipe down the sink with a soft, dry cloth after each use to prevent water spots.
- Clean more significant buildup or dirt with a mildly abrasive cleaning product or baking soda; apply with a damp sponge. Daily abrasive cleaning will not harm the finish.
- For best results, lightly coat the sink with liquid wax once a month to encourage proper drainage.

Many surface scratches may actually not be scratches at all. In fact, it's more likely that the "scratch" is simply residue or scuffing from other objects in the sink. These scratches are usually easily removed with a mildly abrasive cleanser or scrubber.
