

This is a detailed architectural floor plan of a building, oriented vertically. The plan shows a complex arrangement of rooms, corridors, and service areas. A specific section in the upper left quadrant is highlighted with a thick green border. This highlighted area includes a small room with a door, a larger room with a desk and chair, and a small kitchenette area with a sink and counter. The rest of the plan shows various other rooms, including what appears to be a large central hall, several smaller offices or meeting rooms, and a staircase area at the bottom right. The drawing is a black and white line plan with some green highlighting.

Chemical handling with the
use of personal protective
equipment (PPE) is required.
