IMPORTANT!

Installation of the towing electrics kit must be undertaken by a specialist workshop or an appropriately qualified person. Before starting work, you must read the installation instructions through completely. After installing the towing electrics kit, the installation instructions should be kept with the vehicle service documentation.

All claims under the guarantee will lapse in case of improper use or modification of the towing electrics kit or any of its component parts. When driving without a trailer or load carrier, any adapter installed must be removed from the electrical socket. We reserve the right to alter the design, content or colour. We accept no liability for any errors in these instructions. All details and illustrations are non-binding.

In case of missing a rear fog lamp on the trailer, it should be retrofitted.

We accept no responsibility and give no guarantee for technical and electrical modifications made after the initial operation of the towing electrics kit by the vehicle manufacturer and which may lead, for example to malfunction of the trailer socket or its peripheries.

The trailer module is not diagnostics-capable. If the manufacturer's diagnostics processes or software-supported test mechanisms generate error reports directly or indirectly linked with trailer operation, the trailer module must be disconnected from the leads to the trailer socket and a new diagnostic process initiated.

SYMBOL EXPLANATION

	left (58-L) respectively right (58-R) tail light		cigarette lighter / accessory socket
	stop light (54) / high mounted, third stop light (54)		loudspeaker / buzzer
	turn signal indicator left		Park Distance Control
	turn signal indicator right		switch / source of function
	rear fog light(s)		Connect together
	reversing light(s)		Disconnect
	Permanent power supply / 13pin socket, chamber 9		Look at / See further information
	charging wire for trailer fridge / 13pin socket, chamber 10		Look carefully at selected area
	trailer / trailer recognition		Present / Occupied / OK
B+/30	Permanent current power supply		Not present / Not occupied / Not OK
	Ground or Earth (31)		left
	ground connection battery terminal lug		right
	positive connection battery terminal lug		acoustic indication
	fuse / fuse capacity 20 Ampère		attention / important advice

Tools

ATTENTION!

The vehicle's cooling capacity may have to be increased when retrofitting a trailer coupling! You must observe the manufacturer's instructions!!

ATTENTION!

In order to avoid mal-functions and damage to the vehicle's electrical system the earth terminal must be disconnected from the vehicle's battery before starting work!

Both the trailer module and the vehicle's control unit for the electrical system can be damaged during work on the data bus connections if the battery is not disconnected!

Please pay attention to the manufacturer's instructions when disconnecting and reconnecting the vehicle's battery!

The following lamp functions for the trailer are not supported by all towing vehicles with DRL circuit:

- Rear lights
- Side lights
- Numberplate lights

The parking lights or dimmed headlights must be switched on to activate this function!

Set up trailer operation

Please effect coding as follows:

- Vehicle self-diagnosis
- self-diagnosis
- 19 – diagnosis interface for data bus
- 008-Coding (service 22)
- 008.02 assembly list coding
- 69 – trailer function (switch to coded!)
- confirm with OK !

Vehicles with park assist systems II

- Guided troubleshooting
- Function / component selection
- Bodywork
- Bodywork - installation work
- 01 - Self-diagnosing systems
- 10 - PDC
- 10 - PDC functions
- Coding (Rep.Gr.94)
- follow the menu (encode trailer coupling as installed)

Important notices:

Vehicles with start-stop system:

The start-stop system is deactivated in trailer mode!

55

Diagnosis function of control LEDs

Lamp substitution if the trailer indicators fail

The failure of a trailer indicator (right left or both sides) is reported to the driver in the towing vehicle's combi-instrument via a text message in the display, an increase in the flashing frequency and/or a control lamp for light failure coming on.

If the indicator is activated, the corresponding rear tail lamp on the trailer becomes the indicator

(▶ lamp substitution):

If an indicator fails the left or right rear tail light compensates for the faulty indicator by flashing at the correct frequency!
