Product Details

Safari Snorkel part number SS177HP suits Isuzu D-Max RG01 TFR/S MY21 and Isuzu MU-X RJ01 UCR/S MY22 (All Models), fitted with the 4JJ3-TCX 3.0Ltr-I4 Turbo Diesel Engine.

Safari ARMAX Snorkel SS177HP features Safari's new style ARMAX Air Ram. Safari ARMAX Snorkel SS177HP is now available for Pre Order, for despatch in November 2022.

The Safari Snorkel is the ultimate protection against water, dust and snow ingress. The Safari Snorkel delivers cool, clean air to your vehicles engine.

The new Armax Design is the start of a new generation of raised air intakes from Safari 4x4 Engineering. These snorkels are all new designs to optimise airflow whilst remaining a watertight raised air intake. This ensures that if the vehicle owner wishes to increase their vehicles engine performance (utilising Engine Management and Exhausts), this product will provide the necessary airflow required.
