

**'SAFETY' IT'S IN YOUR HANDS**  
**BY**  
**BILLY P**

Billy Parker is a SAFETY ADVOCATE who has a passion for saving limbs and lives.

Billy has 20+ years experience in the welding and fabrication trade. He has participated in and applied OSHA SAFETY STANDARDS from *Confined Space* to *Lockout-Tagout*.

Billy is a member of a group called "Moving Forward Limb Loss Support Group" and is a CPV (Certified Peer Visitor) with the Amputee Coalition, bringing together amputees and their care givers. He also volunteers as a personal assistant showing other amputees how to use their new prosthesis and a recipient of a 2018 Comp Laude award for Injured Worker.

One day while cleaning out a machine (a drywall shredder) while it was running he was caught and was being pulled into the machine.

Now Billy's mission is to bring SAFETY AWARENESS to the workplace. He wants to share a story about the mistakes made that January morning and how losing his arms has changed the way he lives and feels about life.

Through personal stories, humor and real life situations Billy can make sure your employees will remember the "WHY" behind SAFE WORK PROCEDURES.
