---

Over fifteen years of experience in the Construction and Catastrophe Claims Industry. Experienced in both Commercial and Residential Construction and Claim Negotiation & Management. Ability to Orchestrate multiple projects in a team environment employing real time strategic views. Partnerships, Team Building and Quality Control. I implemented a futurist patent for wind farming the valley areas of California to help with issues of smog and renewable electricity as well as completed a patent injection for remote control lighting by frequency remote for consumer use (Example, remote light bulbs) through GBI in 2001.
