## BIOGRAPHY

Love of all things, life is life and free will is just that. My life should be a reality show; that I mean. Everyday something weird, new, and spontaneous happens. I attract strange things compared to society's norm and I embrace it. I took on a wide range of skills in life from eastern medicine to bio sciences to business admin and computer sciences. I want to be and am a conglomerate. I walked across a whole city to pursue modeling and here I am. If you want it bad enough you will go for it. I love everything from sports, cooking, camping, outdoors and indoors. Why not give things a try, just be yourself when you do and always take pictures.
