PRESENTATION

My name is Augusto Aguilar and I am 27 years old. I started my theater studies in 2017 doing workshops at the Provincial University of Córdoba and also at Espacio Centralia of Artistic Expression, there I trained as an actor and participated in more than 7 theatrical works

In 2018 I started my studies at the School of Film and Television, which allowed me to enter the world of cinema from the technical side and everything that behind the camera implies, with the aim of improving the performance in front of the camera and understanding it from another point of view, this led me to act in different advertisements, short films and movies, including my first acting experience in the United States
