PROJECTS

An Anti -Islanding Protection Scheme for VSM Operated Inverters in DG

Oct 2022 - Jun 2023

https://drive.google.com/file/d/1wmPWoP7YGhTyz6XPVbVKI2b_Ff5F_BGe/view?usp=drivesdk

The project was to create an algorithm to disconnect DG inverters experiencing an islanding condition from the rest of the grid, following IEEE standards. As normal inverters introduce no damping or inertia to the system VSM inverters were used.
