(1984) Diploma

About John

My career has been rooted in leadership and communication with the US Government and over 30 years with a local Non-Profit. I am an Online Content Creator and Founder of Vision for Change Media. Throughout my incredible work with individuals and corporate groups through my media platforms I have created a place for people to learn, laugh and be enlightened. My radio show is available on Radio One as well as podcast streaming services called Vision for Change. Through this platform I share more valuable insight on living a fulfilling life of purpose.

When I am not working in one of these life-changing capacities, I am coaching individuals and groups, bringing joy and entertainment as an actor in feature films, television series, and documentaries as a background talent.

I am a truly a multi-faceted individual whose aim is to encourage and motivate those around me through meaningful insight.
