Objective

From previous work and studies, I have gained an understanding of what it takes to problem solve and meet goals in both personal and collaborative efforts. I am looking to challenge myself in ways that will benefit my (career) interests and apply what I can provide professionally. I strive to learn from others in new environments, especially those in which are culturally diverse and advocate for inclusivity. Having aimed for success in prior accomplishments, I apply a positive work ethic and remain determined to find solutions in further academic and career-related experiences.

Skills

Based on my experience I have a collective skill set from working creatively alone to working collaboratively with others. My main passions are creating music, helping others, and surrounding myself in spaces that help further my pedagogy. I am an effective listener and learn new tasks quickly which makes me just as good a teacher. Time management is also a great quality I possess.

Education
