Work Experience

Medication Technician

Inspirit Senior Living - Lecanto, FL

September 2023 to December 2023

While working at the Reserve at Citrus I had a lot of responsibility making sure that my residents were taken care of in a professional and efficient manner. I would assist in everyday activities such as showers, getting ready for the day, meals, and even making phone calls. I also assisted in handing out medications and in the event of a resident falling or having a medical emergency, I would take care of the situation in the best way possible based on what the situation was.

Utility Technician I

CITY OF BROOKSVILLE - Brooksville, FL

March 2023 to September 2023

During my time with the City of Brooksville I was on a small team that repaired water leaks throughout Brooksville. In my time there I also learned how to use large vac trucks, and high powered pressure washers, I used street saws to penetrate asphalt and other rock layers to get to water leaks, we used backhoes and trackhoes on softer earthy layers, and pressure washed closer to the leak as a means of minimizing further damage to the water lines. I've been out in situations where I would be buried under sidewalks while repairing water leaks, and situations where I would be swimming down in a hole to reach a leak that had to be fixed. We also would clear sewer backups, so in doing so I also learned about using line cameras with remote display screens, as well as using high pressure hoses with different tip attachments to cut or push through blockages. I have had countless hours of shoveling to excavate and backfill some leaks, as well as several hours operating backhoes, trackhoes, and compactors to backfill holes.

Line Cook

Sonic Drive-In - Crystal River, FL

March 2022 to February 2023

While working as a line cook for Sonic, I was responsible for quality control over the food going out as well as ensuring that estimates of what we needed during rush hours were accurate. I usually worked alone in the kitchen manning the grill, the fryer, and keeping up with dishes at the same time. I would spend a considerable amount of time at the start of my shift making sure that every station was stocked well enough that I wouldn't have to abandon my post mid rush, as well as checking what the sales were so far for that day so I could better project what to expect for the rest of my shift.

Food Runner

Crumps Landing LLC - Homosassa, FL

January 2022 to April 2022

As a runner I was responsible for delivering the right food to the right table and guest in a time efficient and accurate manner while also ensuring that I took the time to make sure every guest had what they

needed. I would also assist in bussing tables or assist in bar backing when the restaurant was short handed. Towards the end of my employment there the restaurant was truck by lightning and had to close for a bit but my bills needed to be payed so I had to find somewhere else to work.

Shift Manager (full-time)

Inspire Brands-Arby's - Crystal River, FL

June 2020 to December 2021

As a shift manager, I maintained all of the same responsibilities as a crew member. These involved delivering excellent customer service in a multitude of situations, operating a cash register and handling money regularly, operating fryers and meat slicers, and regular maintenance to ensure restaurant cleanliness. I also adopted a multitude of responsibilities as shift manager including things such as tracking store labor and sales, equipment maintenance, scheduling, advertising, and head-on team leading.

Education

High school diploma

Crystal River High School - Crystal River, FL

August 2018 to May 2022
