

Tyler Fennelly

Camera Trainee

For as long as I can remember, I have maintained an undying passion for all things entertainment; anything from film and music to comedy and sports – as all of these are just a few of my keen interests.

I am seeking an opportunity to be an active participant within the Film Industry; working in all aspects of film creation whether in front or behind the camera. I would consider myself to have a strong willingness to be dedicated, focused and on time to help create great film content.

I have been studying Creative Media in the School of Communication at The University of Alabama with a focus in film.

In 2023, I was in two feature films as an extra and was present on set during the filming of the upcoming movie “The Electric State”. I also attended The February 2024 edition of “PA Academy”, which was directed by Linda Burns and produced by *Georgia Production Partnerships*.

I am capable of operating several softwares such as Excel, Adobe Photoshop, FI Studio, Final Cut Pro, Serato DJ Pro, Powerpoint, and Blender.

I am confident to say that I can secure quality footage as a videographer using anything from a smartphone camera (with a gimbal) to a DSLR and a mirrorless camera. However, I am thrilled to acquire new knowledge on how to operate professional equipment as a videographer and to grow as a significant member of the film industry.

I am hardworking and ambitious in pursuit of an opportunity to join a team as a camera trainee and build up expertise to expand into other roles in the business. I am able to work long shifts through tough conditions while still keeping up a positive attitude and sharing good humor.
