CAREER SUMMARY

With 17 years of dedicated experience in drafting within a local government unit, I have honed a comprehensive skill set that combines technical expertise, precision, and a keen understanding of municipal regulations and community needs. My tenure has been marked by:

- Technical Proficiency:** Advanced proficiency in Autodesk Revit, AutoCAD, 3D design software, and other drafting tools, enabling the creation of detailed and accurate plans and schematics.
- Project Variety:** Extensive experience across a diverse range of projects, including public infrastructure, urban planning, and community development initiatives. This breadth of experience has equipped me with the versatility to handle complex and varied drafting tasks.
- Collaboration:** Proven ability to work collaboratively with engineers, architects, urban planners, and other stakeholders to ensure that all projects meet regulatory standards and community expectations.
- Regulatory Knowledge:** In-depth understanding of local government regulations, zoning laws, and building codes, ensuring that all drafted plans comply with relevant legal and safety requirements.
- Problem-Solving:** Strong problem-solving skills, with a track record of identifying and resolving design issues, improving project efficiency, and ensuring the successful completion of projects.
- Community Focus:** Commitment to creating designs that enhance community welfare, support sustainable development, and contribute to the overall improvement of local infrastructure.
- Continuous Improvement:** Dedication to professional development, staying updated with the latest drafting technologies, design trends, and regulatory changes to continuously improve the quality and efficiency of my work.

SKILLS AND QUALIFICATION

With a strong background in mechanical drafting, I have developed a high level of proficiency in utilizing Autodesk Revit for creating detailed and accurate mechanical designs. My key skills in this area include:

- Advanced Proficiency in Autodesk Revit:** Expertise in using Revit for mechanical drafting, including creating and managing complex 3D models, and producing detailed mechanical drawings and schematics.
- BIM Integration:** Skilled in Building Information Modeling (BIM) integration within Revit, facilitating seamless collaboration and coordination among various project stakeholders, and enhancing the accuracy and efficiency of mechanical designs.
- Detail-Oriented Drafting:** Ability to produce precise and comprehensive mechanical drawings, including HVAC systems, plumbing, and other mechanical components, ensuring all designs meet project specifications and standards.

System Design and Analysis: Competent in designing and analyzing mechanical systems within Revit, using its tools to simulate and evaluate system performance, energy efficiency, and overall functionality. Collaboration and Coordination: Experience in working collaboratively with architects, engineers, and other professionals, using Revit's collaborative features to ensure cohesive and integrated project outcomes. Customization and Automation: Proficiency in customizing Revit families and templates to suit specific project requirements, and using automation tools to streamline repetitive tasks and improve drafting efficiency. Regulatory Compliance: Thorough understanding of relevant building codes and mechanical standards, ensuring all drafted designs comply with local regulations and safety requirements. Continuous Learning: Commitment to staying updated with the latest features and updates in Revit, as well as industry trends and best practices in mechanical drafting, to continually enhance my skills and knowledge.

WORK HISTORY: I was employed as a Drafter in the Municipality of North Upi, Maguindanao philippines from June 10, 2004 to January 3, 2014 During my time there, I was responsible for creating and drafting construction plans, blueprints, and technical drawings for various municipal infrastructure projects My work involved collaborating with engineers, architects, and municipal officials to ensure the accuracy and feasibility of the designs ,Throughout my 10-year tenure, I contributed to the successful completion of numerous public works initiatives that enhanced the local community's infrastructure and facilities. I have been employed as a Drafter in the Municipality of Trento, Agusan del Sur, Philippines since May 02, 2017 to the present. In this role, I have been responsible for creating and drafting construction plans, blueprints, and technical drawings for various municipal infrastructure projects. My work involves collaborating closely with engineers, architects, and municipal officials to ensure the accuracy, feasibility, and compliance of the designs with all relevant building codes and regulations. Utilizing my expertise in computer-aided design (CAD) software, I have produced detailed and precise drawings that have been instrumental in the successful completion of numerous public works initiatives in the municipality. Additionally, I have been involved in the installation of new pipelines for the Trento Municipal Water System, a project aimed at improving the community's access to clean water. Throughout my time in Trento, Agusan del Sur Philippines, I have contributed to the enhancement of the local community's infrastructure and facilities through my diligent and proficient drafting work
