Experience

Cabinet Installer

Disputanta, VA

T3 Solutions/Jul 2016 to Current

- Installed cabinets and countertops in residential homes according to customer specification
- Measured, cut, and installed baseboards, crown-molding, and other trim pieces to complete cabinet installations.
- Assembled prefabricated cabinets using screws, bolts, nails, glue, or other fasteners.
- Ensured that all cabinet doors opened and closed properly after installation.
- Aligned cabinets with walls for level installation using a spirit level tool.
- Utilized power drills and saws to cut out openings for sinks or dishwashers when needed.
- Repaired damaged cabinetry by replacing hinges, drawer slides, and door handles.
- Filled any gaps between the wall and cabinets with putty or caulk as required.
- Inspected completed installations for accuracy before leaving job site.
- Always adhered to safety protocols while on the job site.
- Cleaned up work area once finished with project.

- Collaborated with contractors and other tradespeople on larger jobsites.
- Worked efficiently under tight deadlines without compromising quality of workmanship.
- Worked at customer locations to replace existing or install new cabinets for residential or commercial use.
- Completed work quickly and helped team members to achieve deadlines and satisfy customers.
- Communicated with teammates and supervisors frequently to understand requirements and complete projects on time.
- Consistently constructed square and level projects.
- Adhered to project blueprints and requirements to deliver quality work.
- Measured and marked cut lines on materials using ruler or marking gauge.
- Verified trueness of construction using plumb and level.
- Removed damaged or defective parts or sections of structures and repaired or replaced using hand tools.
