

Take control of your meeting spaces
Monitor meeting space utilisation and optimise resources

Organiser	Events	Total Duration (H)
Neil Hampton	235	378 hours
Lindsay Young	160	256 hours
Alvaro Hayes	156	254 hours
Izayah Williamson	152	244 hours
Sean Burns	140	234 hours

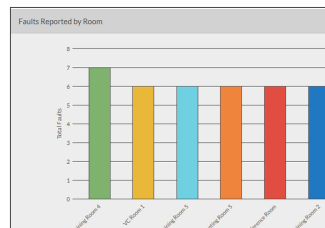

Monitor Space Utilisation

Gain invaluable insight into meeting space utilisation, including individual user behaviour, such as who books the spaces, how frequently and who is a constant no-show. This information can be used to address no-show offenders to reduce resource wastage.

Room #	Total Duration (H)	Utilisation (%)
Meeting Room 6	0 hours	0%
Meeting Room 7	0 hours	0%
Meeting Room 8	0 hours	0%
Meeting Room 9	0 hours	0%
Meeting Room 10	0 hours	0%
Meeting Room 11	0 hours	0%

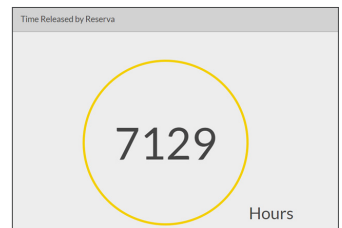

Demonstrate ROI

Data can enable facilities teams to validate or debunk subjective feedback from teams on 'not enough meeting space'. Analytics reveals how much rooms are utilised, and if this demonstrates sufficient ROI, and if not, they can be repurposed.

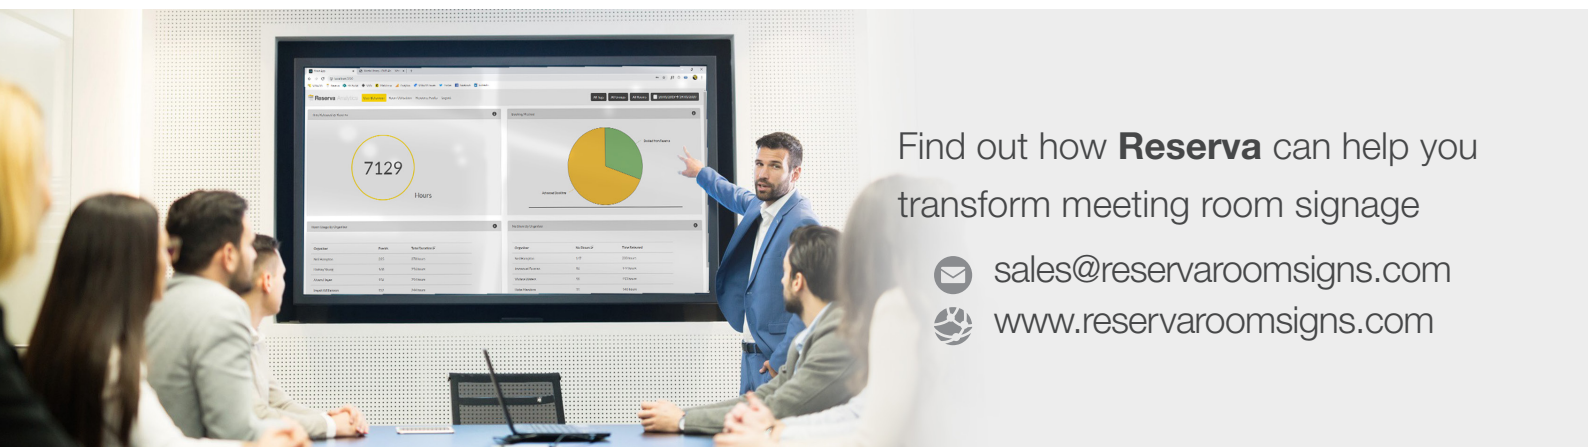

Room Resource Information

Identify and filter fault reporting by user, room or resource type enabling the service team to resolve resource issues efficiently and identify training requirement if fault reporter is consistently the same employee. Easily identify an increase in faults reported against meeting room resources.

Supports Strategic Decisions

A clear to use, browser-based data dashboard, allows organisations to monitor meeting space utilisation and optimise resources accordingly. These analytics enable organisations to base their long-term strategic decisions on proven quantitative data.

Reserva Analytics Features

Reserva Analytics allows the user to filter the data by a selection of pre-set date ranges or by a custom range as well as filtering by room type, location or a custom tag.

Data is presented in clear, easy-to-read graphs with the option to drill down to a larger data set for more in-depth analysis.
