

**VISION Professional Short Throw or Ultra Short Throw Projector Wall Mount - LIFETIME WARRANTY(TM-ST2)**

**Telescopic boom with length 930 to 1530 mm from wall to middle of projector - Projector can be mounted at any point along the boom - Boom gradient adjustable - white**

The Techmount ST2 supports 99% of short-throw and ultra-short-throw projectors with no extra parts required. It is a strong, flexible mount which uses Vision's universal spider fitting to attach projectors.

**Key Selling Points**

- Telescopic boom 930-1530mm / 36.61" x 60.24" (center-of-projector to wall)
- Projector can be mounted at any point along boom
- Adjustable boom incline

**Product Features**

- Long boom**  
The boom is long enough for short throw projectors to project an image 2000 mm wide. The spider can be mounted at any point along the boom.
- Telescopic**  
The two-part boom allows easy adjustment of image size. Cables are dropped down the pole during assembly. The pole which fits to the wall bracket is 800 mm long, and the outer pole is 900 mm long.
- Gradient adjustment**  
A flexible wall plate allows the installer to alter the slope of the boom to offset the weight of heavy projectors.
- Projector tilt**  
The TM-ST2 allows plenty of roll adjustment.
- Fine adjustment**  
The wall plate gives the installer some fine-tuning adjustment of the boom up and down and side to side.
- Security bit**  
The TM-ST2 uses pin-hex security bolts which require a bespoke hex key. Vision includes a pin-hex drill bit to help assemble the product quickly using a power drill.
- One-person installation**  
The modular design makes it simple to fit quickly. Just fix the wall mount in place, fit the boom, then attach the projector.

**Main Specifications**

Product Description	Vision Techmount TM-ST2 mounting kit - telescopic - for projector - satin white
Product Type	Mounting kit (telescopic)
Mounting Components	Wall bracket, pole
Adjustments	Tilt
