

DHRUV RATHOD

Python Full Stack Developer | Freelance Translator | Localization Specialist

Ahmedabad, Gujarat, India • 9558779062 • dhruvrathod167@gmail.com

PROFESSIONAL SUMMARY

Freelance professional combining Python full-stack development with English–Gujarati and English–Hindi translation and localization. On the development side, builds web applications with Django, FastAPI and REST APIs on the backend and React/Next.js on the frontend. On the language side, translates and localizes written content while preserving meaning, tone and context, and provides proofreading and AI-translation post-editing. Comfortable owning a project end to end — planning, execution, quality review and delivery — and communicating clearly with remote clients throughout.

DEVELOPMENT SERVICES

- Python full-stack development — Django web applications, Django REST APIs, FastAPI backends
- React / Next.js frontends — responsive websites, business websites, admin dashboards
- CRUD applications, authentication & user management, database integration
- Bug fixing, feature development, existing project maintenance, deployment troubleshooting

TECHNICAL SKILLS

Backend	Python, Django, Django REST Framework, FastAPI
Frontend	React, JavaScript, HTML5, CSS3, Vite, Next.js, Tailwind CSS
Database	SQLite, SQL
APIs	REST API design, third-party API integration
Tools	Git, GitHub, VS Code, Postman, Node.js
Deployment	GitHub Actions, build & deployment troubleshooting

LANGUAGE PROFICIENCY

Language	Proficiency	Primary Services
English	Professional working proficiency	Translation, editing, proofreading
Gujarati	Native / fluent	Translation, localization, proofreading
Hindi	Fluent	Translation, localization, proofreading

PORTFOLIO PROJECTS — DEVELOPMENT

Nova AI — Full-Stack AI Application

Stack: Python, FastAPI, , REST API, Electron, GitHub Actions

Personal project built to practice an API-first backend with desktop/web-facing components and automated delivery tooling.

Luxury Architecture Studio Website

Stack: React / Next.js, JavaScript, Tailwind CSS

Personal project focused on visual hierarchy, responsive layouts and reusable components for a portfolio-style business site.

Django Business Applications

Stack: Python, Django, REST APIs, SQLite

Personal project covering backend architecture, CRUD workflows, forms and database integration for a small business use case.

PORTFOLIO PROJECTS — TRANSLATION

Website Localization — English → Gujarati

Localized website pages, service descriptions, FAQs and customer-facing copy with emphasis on natural wording and consistent terminology.

E-commerce Product Translation — English → Gujarati / Hindi

Adapted product titles, descriptions, features, specifications and promotional language for regional audiences.

Business Communication — English → Gujarati / Hindi

Translated professional emails and general business communication while maintaining formal tone and clarity.

App Localization — English → Gujarati / Hindi

Prepared sample translations for interface labels, notifications, onboarding text and user-facing application content.

TOOLS & TECHNOLOGY

Development: Git, GitHub, VS Code, Postman, Node.js, GitHub Actions. Language work: Microsoft Word/Excel, Google Docs/Sheets, PDF documents, Google Workspace, online reference tools, AI-assisted translation workflows, grammar & writing tools.

WORKFLOW

Development: Requirement Discovery → Planning → Development → Testing → Quality Assurance → Client Review → Revision → Final Delivery.

Translation: Source Review → Translation → Localization → Proofreading → Final QA (source-vs-target comparison for omissions, meaning and formatting).

EDUCATION

Bachelor of Computer Applications (BCA) — Asia Pacific College / Gujarat University, Ahmedabad, India

Relevant coursework: Python Programming, Web Development, Database Systems, System Analysis & Design
