Tile flange - detail

Bathtub installation supplies

A tile flange will be supplied to comply with the requested position. Installed at the factory to prevent water leakage, this must be placed directly on the partition framing prior to the installation of drywall.

Plumbing installation restriction

BC 0101, freestanding bathtub requires a vertical plumbing connection rising from the floor. A horizontal connection is only possible by drilling a hole in the side of the tub. Please refer to the installation instructions available on our web site.

WETSTYLE cannot be held responsible for any technical errors and reserves the right to make revisions without notice.

Approximate measurement.
The manufacturer accept 1/4" (6.35mm) variance.
